GARDEN GUIDE

FOR THE SOUTH.

DIRECT IMPORTERS OF NEW, USEFUL AND ORNAMENTAL PLANTS.

GARDEN, ORCHARD, FOREST TREES AND PLANTS OF ALL SORTS SUPPLIED

PLANTS BY MAIL A SPECIALTY.

PLANS AND ESTIMATES FURNISHED AND CONTRACTS TAKEN FOR LAYING OUT GROUNDS.

CALIFORNIA AND OTHER SEEDS WHOLESALE AND RETAIL.

AGENTS FOR AGRICULTURAL AND HORTICULTURAL BOOKS AND PERIODICALS

In presenting to the public our GENERAL CATALOGUE AND GARDEN GUIDE FOR THE SOUTH, we desire to express our sincere thanks to all persons in this country and abroad who have patronized and encouraged this enterprise, and at the same time wish to state plainly that our purposes are:

To forward the development of the horticultural capabilities of Southern California, where plants from nearly every climate are thriving to perfection together:

To introduce and to experiment upon all sorts of plants likely to have some

economic or ornamental value, and to propagate and offer for sale such as will prove most desirable:

And generally to promote by all means in our power knowledge and taste

And generally to promote by all means in our power knowledge and taste for horticulture all over the United States, and particularly in the South. To enable us to attain such results the hearty cooperation of persons interested in horticulture is confidently solicited. We are willing on our side to furnish all advice and informations desired, as also to submit special lists of plants suitable to special wants and locations.

Our Catalogue comprises a selection of the most desirable plants, but we can furnish also any other plant not mentioned there and obtainable in the trade.

Our terms are STRICTLY CASH WITH ORDER.

Parties ordering plants are requested to specify way of shipping they prefer: if by mail, five cents for each plant will cover charges within the United States, Mexico and Canada.

BOX 1500, SANTA BARBARA, California, U. S. A. DR. F. FRANCESCHI,

Manager.

PLEASE READ THIS.

Names printed in CAPITALS are of plants first offered by us in the United States.

* Denotes plants to be grown safely in open ground where the lemon can be grown.

** Denotes plants adapted only to practically frostless localities.

For remaining plants, the Apricot may be taken as a standard: some will endure more cold, as will be specified.

PALMS AND CYCADS.

Universally acknowledged to be the noblest and most prominent ornament in gardens, PALMS will have their beauty constantly increasing with age. Their multiform economic uses are indeed beyond enumeration, but considered only as ornamental plants, their adaptability to different purposes is unsurpassed: from the decoration of windows, halls and jardinieres to the building of stately avenues and picturesque groves. Palms are naturally distributed all over the tropics of both hemispheres, with a few representatives in temperate regions, some of which will stand many degrees of frost. Most Palms will thrive better in full sun, some will prefer partial shade: rich soil and plenty of water when growing are desirable; but there are not a few, like the common Date Palm and other kinds of Phænix, the California fan Palm, Chamaerops humilis, and others, that will all thrive in rocky and dry places without irrigation. CYCADS, although distinct from Palms in organic structure, partake of the same characteristics as ornamental plants, and are horticulturally classified with them.

25

*Archontophoenix Alexandrae, Queensland

Commonly known as Ptychosperma Alexandrae, or "Alexandra palm," similar in habit to the following, but more stately and attaining larger size.	20
*Archontophoenix Cunninghamii, East Australia	25 to 5 00
**ARECA, new species, Madagascar	50
**Arenga saccharifera, Moluccas The "gomuti palm," yielding sugar and strong fiber; fronds silvery underneath.	1 50
**Attalea cohune, South Mexico and Guatemala The "Coquito or palma de aceite" the fruit of which are exported in large quantities for soap making; fronds standing erect and over 30 feet high.	2 50
**Attalea mariposa, Brazil	1 00
*BRAHEA, new species, Mexico A dwarf elegant kind, with shining leaves.	1 00
**Caryota sobolifera, India	50
*Chamaedorea desmoncoides, Mexico	50
*CHAMAEDOREA NEC PLUS ULTRA? Mexico Most elegant dwarf species, similar in habit to Cocos Weddeliana, but much hardier.	50
*Chamaedorea Ernesti Augusti, Mexico	50
*CHAMAEDOREA SARTORI, Mexico	50
*CHAMAEDOREA TEPEJILOTE. Mexico.	50 to 1 00
All the above are graceful dwarf kinds, blooming quite young, the flowers stalk and pedicels being of the brightest scarlet; will make admirable pot and window plants	50 10 1 00

Chamaerops Birroo, China?			50
Chamaerops humilis, South Europe and North Africa One of the hardiest palms, growing very compact and suitable for small lawns.	25 to	2	00
**Chrysalidocarpus lutescens, Mauritius The correct name for "Areca" lutescens, one of the prettiest and most elegant palms for house decoration, with light green leaves and golden yellow stems.			50
Cocos australis, River Plate			50
*Cocos datil, southern Brazil		1	00
*Cocos flexuosa, southern Brazil Similar in habit to the following, but with more finely cut leaves, and in Southern Europe considered to stand more frost.		1	00
*Cocos plumosa, southern Brazil	00 to :	3	00
*Cocos. Romanzoffiana, southern Brazil Similar to the preceding but with fronds standing more erect; fruit edible, called "geriva."		7	00
**Corypha elata, India			00
**Corypha gebanga, Java		1	00
**Corypha umbraculifera, Ceylon		1	00
**Dictyosperma album, Mauritius		1	00
**Dictyosperma rubrum, Mauritius Commonly known as Areca alba and Areca rubra, both making very pretty house plants; the first with leaves veined pure white, the second with crimson.		1	00
**DYPSIS species, Madagascar A new undetermined species closely related to the two preceding.		1	00
**Elaeis Guineensis, Guinea The well known "Oil Palm," from the western coast of Africa; with grace- jul dark green pinnate leaves.		2	00
Erythea armata, lower California The striking "blue palm," known also under the names of Brahea glauca and B. Roezli; probably the most glau, ous of palms; will prefer rocky soil, and will stand some degrees of frost.	50 to 3	3 1	00
Erythea edulis, Guadalupe Island. More rapid grower than the preceding, and one of the finest and hard est fan palms. Trunk slender, 30 feet and more high; leaves broad, bright green, with woolly petioles; blooms quite young, bearing a wonderful profusion of large, round fruits turning black at maturity, and edible.	25 to 3	3	00
**Euterpe edulis, Brazil The "Assai palm" of Para, making also a pretty ornamental house plant.	1	1	00
**Geonoma gracilis, Brazil			50
**Geonoma elegans robusta, Brazil			50
**Geonoma Pohliana, Central America			50
**Geonoma Schottiana, Brazil All Geonomas are most elegant dwarf palms with the habit of Chamaedoraeas, but more tender.			50
	a a getting of		

*Hedyscepe Canterburyana, Lord Howe's Island	50 to	3	00
*Howea Belmoreana, Lord Howe's Island	25 to	3	00
*Howea Forsteriana, Lord Howe's Island	50 to		
More known as Kentia Belmoreana and K. Forsteriana; no doubt the most popular of house palms, and deservedly so; both will prefer partial shade, if planted out.			00
**Hyophorbe amaricaulis, Mauritius A stately palm with deep green leaves, orange midribs and maroon stems.		2	50
**Hyophorbe Verschaffelti, Rodriguez Island			En
This has gracefully arching fronds veined with white, and makes an easily grown and not delicate house plant.			50
Jubaea spectabilis, Chile	50 to	5	00
One of the most hardy palms, can endure drought and many degrees of cold; if liberally treated will grow fast enough, and build huge trees in a few years. Fruits are called "coquitos" and look like a diminutive Cocoanut.			
**Latania Commersoni, Mauritius		2	00
**Latania Loddigesii, Round Island		2	00
Both highly ornamental dwarf fan palms, the first having red margined spiny leaves, the second glaucous green leaves.			00
*Livistona australis, East Australia	25 to	5	00
Known in gardens also as Corypha australis, one of the most popular and hardy house palms; will stand slight frosts; beautiful specimens with slender trunks and dense crown of dark green fronds are to be seen in Santa Barbars, Los Angeles and San Diego.			
*Livistona chinensis, Southern China	25 to	2	00
More generally known under the wrong name of Latania Borbonica, simi- lar to the preceding and even more used for house plant; will need partial shade when planted out.			
**Oreodoxa oleracea, West Indies		1	00
The "cabbage palm" attaining in favorable conditions 170 feet: a very fast grower; in some places cut down for the central tender leaves or cabbage when only three years old.			
**Oreodoxa regia, Cuba1	00 to	2	00
der, smooth, whit, attaining over 100 feet.			
*Phoenix Canariensis, supposed to be a garden hybrid Perhaps the most popular and most easily grown of all palms, and too well known to deserve description.	25 to	5	00
*Phoenix dactylifera, North Africa	25 to	5	00
The common date palm, of which a very large number of varieties exist and some may be profitably grown in the south. Not very ornamental in the young state, but hardly to be surpassed in mature age.			
*Phoenix farinifera, India Very compact growing and ornamental, with shining dark green fronds.		1	25
*PHŒNIX HANCEANA. Southern China			50
A most graceful dwarf kind recently discovered, and to our knowledge never before offered in the trade.			90
*PHŒNIX JUBÆ, Tenerife			50
Closely related to the common date, and apparently peculiar to the Canary Islands.			
*Phœnix pumila, Southern China			25
Another dwarf growing kind, most suited for house decoration.	0-	-	0.0
*Phoenix reclinata, South Africa Quite ornamental for its slender trunk, orange colored leaf stalks, and gracefully arching fronds generally hanging hedge ways.	25 to	5	00

	*Phoenix rupicola, Himalaya	\$	50
	*Pritchardia Gaudichaudi, Hawaiian Islands		50
	*Pritchardia pacifica, Fiji islands Two truly magnificent fan palms, having a peculiar appearance of their own.		50
	**Pseudophœnix Sargenti, extreme southern Florida The choicest palm we offer, and very likely not grown by anybody else at present, the original trees being exceedingly limited in number and bearing seeds very sparingly.		5 00
	*Rhopalostylis Baueri, Lord Howe's island		50
	*Rhopalostylis sapida, New Zealand		50 & 1 00
	Known also as Areca Baueri, and A. sapida; two feathery leaved palms, the first growing larger and having broader pinnae.		1 00
	*Rhapis flabelliformis, Japan		1 00
	A most graceful dwarf palm growing in thick dark green clumps, a very good house plant; will prefer partial shade if planted out.		50
	*Sabal Blackburniana, Bermuda		50
	*Sabal Ghiesbreghti, Mexico		50
	*Sabal Mexicana, southern Texas and Mexico		50
1	Sabal Palmetto, Carolina to Florida		25
	*Sabal umbraculifera, West Indies		50
	All Sabals belong to the fan leaved section of palms, but showing in their leaves the transition to the pinnate leaved section, as very prominent in S. palmetto, the most known and hardiest of them all.		
	**Scheelea butyracea, Venezuela A truly magnificent and vigorous palm, having the habit of Attaleas.		1 50
	Serenoa serrulata, Florida		25
	Trachycarpus excelsus, China		25 to 5 00
	The correct name for Chamaerops excelsa, or Chusan palm, no doubt the most hardy of all palms, fast growing and easily transplanted; makes also an excellent house plant.		
	Washingtonia filifera, California	2	25 to 3 00
	Our well known California fan palm, unsurpassed to be sure wherever immediate effect is required.		
	*WASHINGTONIA SONORÆ, Sonora and lower California Recently discovered and apparently quite distinct from the above.		50 to 1 50
	*Cycas revoluta, China and Japan		50 to 5 00
	*Dion edule, Mexico	1 (00 to 10
	*ZAMIA ANGUSTIFOLIA, Bahamas		1 00
	*Zamia integrifolia, Florida	5	25 to 1 00
	Both pretty dwarf kinds, looking like diminutive Cycas revoluta.		

BAMBOOS.

Both on the utilitarian and on the horticultural standpoint hardly any other plants will compete with Bamboos in enriching a country and in beautifying the landscape, if introduced on a large scale. Their wonderfully varied uses, from a tender vegetable or pickle, to the building of houses, are known to everybody, but it is not generally known that in our southern states many of the so-called "giant bamboos" can be profitably grown, and that no other plant will increase and propagate more freely. The Chinese and Japanese kinds mentioned below will endure many degrees of frost. The rich deep alluvial soil of our valleys will particularly suit Bamboos, but it would be a mistake to believe that they will grow only in moist grounds, many of them being in fact ordinarily exposed to very severe droughts in their native countries.

Arundinaria Hindsii, China and Japan\$ 15 feet or more, narrow, grass-like leaves and upright branchlets, giving it quite a peculiar appearance.			50
Arundinaria japonica, Japan 10 to 12 feet with thin, weak stems and broad leaves; desirable as a decorative plant in cold sections, as it can stand many degrees of frost.			25
Arundinaria macrosperma, Southern Atlantic States			25
Arundinaria Simoni, northern China Attaining 20 feet in deep, moist soil; thin stems with permanent sheaths: leaves beautifully variegated, the white predominating; one of the hardiest kinds.	25 to	1	00
Bambusa Castillonis, China and Japan 20 feet and over; stems 1 to 2 inches, bright golden yellow, striped with green; leaves striped pale yellow.			50
*BAMBUSA ARUNDINACEA, India The spiny bamboo of Bengal, will attain 70 feet in favorable conditions, and over four inches in diameter.			50
Bambusa gracilis, Himalaya	00 to 5	2	50
Bambusa verticillata? fol. var. Himalaya?			50
*Bambusa vulgaris, India	2	2 (00
*DENDROCALAMUS MEMBRANACEUS, Burmah		1 (00
*Dendrocalamus strictus, Himalaya 50 to 60 feet high, and about 3 inches in diameter.		2	50
Phyllostachys aurea, northern China	25 to 1	1 (00
PHYLLOSTACHYS BAMBUSOIDES, Japan. Not over 12 feet high; stems thin, but very strong; formerly used for arrows.			25

Phyllostachys mitis, northern China. This is the giant of this section of hardy bamboos, attaining 60 feet and over 2 inches in diameter, according to Robert Fortune who first discovered it.	25	to	1	00
Phyllostachys nigra, northern China	25	to:	1	00
Phyllostachys nigra punctata, northern China		N S	1	00
Phyllostachys viridiglaucescens, northern China. To be sure the best of the hardy kinds, stems deep green turning to yellow, not much over 1 inch but attaining nearly 50 feet in favorable conditions. All bamboos of this section are very hardy and will send out runners in every direction, so that they will cover a large area of ground in very short time.	25	to :	2	50
Thamnocalamus Falconeri, Himalaya			1	00

DECORATIVE PLANTS.

Under this heading are comprised plants other than Palms and Bamboos having bold and striking foliage, which can impart conspicuous and attractive features in gardens or in houses, independent of flowers, although in some cases they may be quite remarkable and showy. These are rather a promiscuous lot, and will need different treatment as specified for each of them. All Agaves, Nolinas, Yuccas and so forth, mostly natives of the arid regions of our southern states and northern Mexico, will grow in the driest places without irrigation at all, but will amply repay any more liberal treatment bestowed on them.

Agave americana, Mexico\$	25	to	2	00
Agave americana, yellow bordered		to		
Agave americana, yellow striped	25	to	2	00
*Agave americana, yellow patched	50	to	2	00
The commonly called "century plant" with its different varieties, invaluable indeed for rough use.				
*AGAVE ATTENUATA, Mexico		- 17	1	00
Building a slender trunk with broad glaucous metallic shining leaves of soft texture, a very remarkable plant.				
*AGAVE DECIPIENS, Florida	25	to :	1	00
Tall growing, leaves dark green.				
Agave deserti, California				50

*Agave Engelmanni, Mexico	1:00
*Agave geminiflora, Mexico	25
*AGAVE GHIESBREGHTII, Mexico	25
Compact, dark green, with formidable spines.	
*Agave Gilbeyi, Mexico	50
*Agave horrida, Mexico	50
Quite horrific indeed for its long spines.	***
Agave mitraeformis, Mexico	50
Agave Palmeri, Arizona	50
Forming a low rosette, glaucous, spines red.	0.5
*AGAVE POTATORUM, Mexico Large growing, the best for the production of "pulque."	25
Agave rigida Sisalana, Yucatan	25
Now extensively planted in Florida and the Bahamas, yielding the well-known "sisal hemp."	•
Agave Salmiana, Mexico	25
One of the largest growing Agaves, leaves deep green; hardier than A. Americana.	
*Agave Shawi, lower California	50 to 1 00
Compact growing, deep blue color, red spines.	0=
*Aloe africana, south Africa	25
*Aloe frutescens, south Africa	25
*ALOE HANBURYANA, south Africa	25
ALOE LATIFOLIA, south Africa *ALOE MACROCARFPA, south Africa	25
*Aloe saponaria, south Africa	25 25
*Aloe Socotrina, Socotora island	25
All above Aloes are moderate sized plants with exception of A. frutescens, growing quite tall; they are eminently adapted for rockeries as well as for house plants; bear bright orange or scarlet flowers, and will stand the roughest treatment.	
Arundo donax, var., southern Europe.	25
White striped variety of the tall common reed, so extensively planted in California.	
*Beaucarnea glauca, Mexico	1 00
Crown of stiff, glaucous leaves on slender trunk, bottle shaped at the base.	
*Beaucarnea recurvata, Mexico	50
*BESCHORNERIA CALIFORNICA, ?	25
*BESCHORNERIA TUBIFLORA, Mexico	25
These are stemless plants related to Agaves with glaucous leaves of soft texture and tall spikes of red and green flowers.	
*Billbergia decora, Peru	25
Leaves 2 feet long with white transverse bands underneath; flowers greenish, accompanied by showy pink bracts; a good house plant.	
Colocasia antiquorum, India	25
The well known "taro" or elephant's ear; very effective in large masses; needs plenty of water.	

Cordyline indivisa, New Zealand	25 to	1 00
*Cyperus alternifolius, Madagascar		25
In this country called "umbrella plant," a great favorite for jardinieres,		
aquariums, &c.		25
Cyperus lucidus,		20
CYPERUS NATALENSIS, Natal		25
Newly introduced, rapidly makes bright green clumps and also nice pot		
plants.		0
Dasylirion glaucum, Mexico		25
Low growing, spiny glaucous linear leaves.		25
Dasylirion gracile, Mexico		20
Dasylirion gracile, Mexico		
Dasylirion quadrangulare, Mexico		50
Dasylirion Wheelerii, Arizona		25
Dwarf, leaves glaucous, spirally twisted. All Dasylirons are highly ornamental plants, fast growers will stand any amount of drought and heat, as well as several degrees of frost.		
	25 to	1 50
*Doryanthes Palmeri, Queensland One of the Australian "torch lilies"; leaves brord, bright green, over 6 feet high; large scarlet flowers in spikes 8-10 feet high.		
*Dracaena draco Tenerife	25 to	3 00
*Dracaena draco, Tenerife The well known "dragon tree" celebrated for one that was growing at Orotava, said to be over 6000 years old.	20 00	
*Dracaena Hookeri, Natal	25 to	1 00
plant.		
*DYCKIA ALTISSIMA, Brazil		50
Belonging to the bromeliacese or pineapple family, building a dense rosette of glossy, bright green leaves gracefully recurved with brown spines; flowers bright yellow.		
*EUPHORBIA CANARIENSIS, Tenerife		25
A tall growing cactus like plant with branching leafless stems.		
*EUPORBIA GRANDIDENS, south Africa		50
Tall growing and branching too; stems toothed all along and spiny.		
*EUPHORBIA REGIS JUBÆ, Tenerife		50
This has cylindrical stems and narrow light green leaves.		50
*EUPHORBIA TIRUCALLI, India		90
Growing quite a tree with cylindrical, leafless, much branched stems; called "milk hedge" in Coromandel.		
	25 to	1 00
Fatsia japonica, Japan	8	
Fatsia papyrifera, Formosa		25
Fatsia papyrifera, Formosa		
*FOURCROYA ALTISSIMA, Mexico		50
*Fourcroya Bedinghausii, Mexico Known also as Roeslia regia, Yucca Parmentieri and other names, too; one	25 to 3	3 00
Known also as Roeslia regia, Yucca Parmentieri and other names, too; one of the most striking and majestic decorative plants; a very rapid grower, builds a stout trunk 15 feet high and over, crowned with long, gracefully drooping bluish leaves; the terminal flower panicle will attain 20 feet or more; flowers white, woolly.		

*FOURCROYA ELEGANS, Mexico	5(
*Fourcroya gigantea, Mexico This has hardly any trunk, erect dark green sparingly toothed leaves over 6 feet long, and a very tall branching panicle of white flowers.	25 to 1 00
*FOURCROYA LONGÆVA, Guatemala	25
*FOURCROYA PUBESCENS, Mexico. All Fourcroyas are first rate decorative plants and are also recommendable for the fiber they yield.	50
GYMNOTHRIX LATIFOLIA, Uruguay Broad leaved, tall growing grass, available also for fodder.	25
Gynerium argenteum, River Plate The well known "pampas grass," the plum s of which are exported in considerable quantity from California	25
*Musa ensete, Abyssinia. The Abyssinian banana, unrivalled for tropical effect; will stand slight frost, and can also be lifted from the ground and housed, where winter would be too cold for it.	25 to 1 00
Growing more slender than the preceding, leaves shorter and less liable to be broken by wind.	1 00
NOLINA BELDINGI, lower California Lately discovered by Mr. T. S. Brandegee on mountains above Cape St. Lucas; arborescent, similar in habit to N. longifolia, but with glaucous leaves.	50
NOLINA BIGELOWII, Arizona Arborescent, tip of leaves curiously twisted and very hygrometrical.	50
Nolina longifolia, Mexico Known also as Dasylirion longifolium, 8 to 10 feet high and more, leaves several feet long, drooping, bright green; quite an invaluable plant for decoration of terraces, large vases, etc.	25
*Pandanus furcatus, Himalaya	2 00
**Pandanus utilis, Madagascar One of the most popular plants for house and table decoration; if planted out will need a warm nook, but partial shade,	50
ranicum excurrens, central Africa	25
Both tropical looking grasses, available also for cattle fodder.	25
*Papyrus antiquorum, Syria and Egypt The peculiar looking "paper plant" so frequent in California gardens.	25 to 1 00
A tall growing, cactus like plant, much branched, bearing large purple flowers.	25 to 1 00
Phormium tenax, New Zealand	25 to 1 00
Phormium tenax fol. var. The well known New Zealand flax and its white striped variety make beautiful and effective decorative plant, being ornamental also for their rusty flowers.	25 to 1 00 25 to 1 00
PITCAIRNIA COERULEA, Chile Belonging to the bromeliads or pineapple family, this has a very short trunk and a large rosette of light gree leaves silvery underneath; its flowers are sky blue, born in a buge panicle 8 feet high; a striking plant attempts.	50

*PUYA CHILENSIS, Chile		25
Another bromeliad building a very stout trunk several feet high and branching with age, leaves armed with hooked thorns and whitish, flowers in long panicles yellowish color.		
**Ravenala madagascariensis, Madagascar	1	00
The far-famed "traveller's tree," will need the warmest location if planted out.		
*Strelitzia augusta, south Africa	1	00
leaves.		~~
Yucca angustifolia, Colorado		25
YUCCA ARBORESCENS, California		25
The strange looking Yuca of the Mojave and Colora lo deserts building with time regular branching trees.		~0
Yucca baccata, southern California		25
Yucca filamentosa, eastern States		25
YUCCA FILIFERA, northern Mexico		50
Attaining 40 feet or more, trunk stout, leaves stiff, short, with filaments, drooping panicles of white flowers.		
*Yucca guatemalensis, Guatemala		50
Yucca Whipplei, southern California	25 to 1	00
Stemless, leaves glaucous, narrow, stiff, sharp pointed; immense panicles	20 00 2	
of white flowers at times twenty feet high. All Yuccas—Spanish bayonets— as they are sometimes called, will thrive in the poorest soil, and for their habit and blossoming are adapted alike to formal as to picturesque garden- ing.		
*XANTHORRHŒA PREISSII, western Australia		50
The "black boys", so called from the appearance of their stout trunks, blackish with resin and through fires, crowned with long rush-like leaves and slender spikes of greenish flowers.		

FRUIT BEARING AND ECONOMIC PLANTS.

Considering the remarkable results obtained already, both in Florida and in California, with the culture of Citrus and other fruits, and in Louisiana and Alabama with the culture of sugar cane, it is safe to say that every effort in this same direction, namely of introducing new useful plants, ought to meet hearty support from every enlightened citizen, because of the evident advantage to the country. We have made a specialty of such introductions, and we are glad to offer for the first time many plants, which from our initial experiments appear quite promising. It will be, however, only through the rational and persevering experimenting of different persons in different localities that any new fruit bearing or economic plant may be definitively acquired to the country.

Aberia caffra, south Africa		50
There called the "kai-apple," a thorny shrub, fruit size of a small apple, will stand some frost.		90
*Achras sapota, West Indies		50
The "sapodilla" or nase borry," a small tree with dark shining leaves, fruit brown, very juicy and sweet.		90
**ADENANTHERA PAVONINA, India		50
Called "red sandai wood" and also "circassian see is," for the bright scarlet seeds being used for ornaments; wood, leaves and seeds medicinal.		90
*AGLAIA ODORATA, Cochinchina	1	00
A tree bearing yellowish flowers deliciously scented, employed to perfume some peculiar board of tea.		
*ALEURITES CORDATA, southern China A tree yielding the best lac varnish.	1	50
*Aleurites moluccana, Moluccas	. 7	00
The "candle nut" tree, from the nuts the "kekune oil" is obtained; fresh nuts have quite a pleasant taste; a rapid grower and beautiful shade tree with foliage like maples; new leaves of pinkish color.	1	00
*Amomum cardamomum, Ceylon		25
The cardamom, having aromatic leaves and seeds.		20
**Ananas sativa, tropical America	25 to	50
The pine apple, of which we can furnish the following leading varieties: black Jamaica, Porto Rico, red Spanish, Ripley queen, smooth Cayenne, sugar loaf. Full details and prices for large quantities will be furnished on application.	20 (0	
*Anona cherimolia, Peru	25 to 2	00
The "cirimoya," by some people wrongly called "custard apple," this being the West Indian name for A. reticulata. A small, bushy tree with broad, aromatic leaves and all spice fragrant flowers, bearing quite young variously shaped fruits attaining 2 and more pounds in weight, the consistence of ice cream when perfectly ripe. Planted to a certain extent in Montectio and in the "ahuenga valley. Fruits find ready market at high prices, both in Santa Barbara and in Los Angeles, and if picked green will easily bear distant transportation.	20 10 2	00
*ANONA MACROCARPA, south America		50
Said to bear larger fruits, young plants appear to be as hardy as the preced-		30

**Anona muricata, West Indies The "sour sop," a small tree with beautiful glossy leaves; fruit large, covered with soft prickles, very juicy and refreshing.	50
*ANONA RENIFORMIS, South America	50
Leaves small, dark green, promises to be even har lier than A. cherimolia.	30
U. U. A	50
The "sugar apple," grown to some extent in southern Florida; leaves, green fruits and seeds much used to destroy vermin, and good for digestion.	
*ANTIDESMA BUNIUS, Malayan archipelago	50
A tree with dark green folinge and small, round berries of a subacid taste, much used for preserves; quite hardy here.	
Arbutus unedo, south Europe and Ireland	1 00
The so-called "strawberry tree," pretty, waxy bell shaped flowers; fruit round, containing a large amount of sugar.	
**Averrhoa carambola, Ceylon	50
Elegantly cut light green foliage; pleasant acid refreshing fruit.	
BENTHAMIA FRAGIFERA, Himalaya	50
**BERTHOLLETIA EXCELSA, Brazil	1 00
**BURSERA GUMMIFERA, West Indies	50
A tall, deciduous tree with erect, clean stem and spreading head, yielding a gum similar to gum mastic.	
	2.4
BOLDOA FRAGRANS, Chile	25
A small tree with fragrant evergreen leaves, bark used for tanning; berries edible.	
**CAPSICUM FRUTESCENS, southern Mexico	50
The tree pepper, from which fruits the celebrated "Tabasco sauce" is manufactured.	30
**CARICA ATROVIOLACEA ELEGANTISSIMA, south	
America	50
Fruit of a violet color.	
*CARICA CUNDINAMARCENSIS, Colombia	50
Probably the most hardy of all "melon papaws"; makes rapidly a bold foliage plant; the sweet scented yellowish flowers being produced here all the year round.	
**CARICA GRACILIS, south America	50
This attains larger size and has palmated finely cut leaves all veined with	
pink.	0.7
**CARICA PYRIFORMIS, south America	25
A variety of the common melon papaw, with pear shaped fruits.	~ ()
*CARICA QUERCIFOLIA, Paraguay and River Plate	50
*CARICA QUERCIFOLIA, Paraguay and River Plate A quick growing, hardy kind, with small fruits; but its large hallebard shaped leaves containing a higher percentage of "papaine" now much used in medicine in preference to "pepsine."	
*CAJANUS INDICUS, India A pretty shrub with yellow and maroon flowers, blooming all through the	25
year, and bearing a continuous crop of richly nutritious peas.	
*Carissa grandiflora, south Africa	25
white, fragrant: fruits red, size of a cherry, very nice eating.	
**Calophyllum inophyllum, India	50
A tall tree with beautiful glossy leaves and white flowers: a prized oil is extracted from its seeds.	

(13)	
Acacia Farnesiana India	
Acacia Farnesiana, India The so-called "cassie" in southern France, where it is grown extensively for perfumery purposes; beginning to attract some attention in California price for large quantities on application.	25

A medium sized tree, yielding the wonderful and celebrated "cola nut." *CRATÆVA RELICIOCA T. 3.	1 00
*CRATÆVA RELIGIOSA, India A small tree, bark and leaves medicinal, flowers very showy.	1 00
"Crescentia cillete West Indias	1 00
"Calabash tree;" hard shell of fruits being used in place of pottery ware.	1 00
*CROTON TIGLIUM southern China	50
A small tree yiel ling the well known "crot m oil;" also a striking plant for the peculiar hues of its leaves, varying from metallic green to bronze and bright orange; has proved to be quite hardy in Santa Barbara.	
	1 00
	1 00
*Cyphomandra betacea, south America The "tree tomato;" berries large, egg shaped; bright orange at maturity. *CYRTOCARDA PROCEDA	25
*CYRTOCARPA PROCERA lower Colifer :	
An evergreen tree bearing edible berries there called "ciruelas", that is	2 00
choritos, that is	

Diospyros kaki, Japan	50
Tane-nashi Fruit large, roundish; flesh yellow and seedless; quality very fine.	
Okame Large, roundish, ob'ate, with well defined quarter marks; light clear flesh when ripe.	
Yemon	
Large, flat, tomato-shaped, flesh deep dull red, brown around the seeds, quality very fine.	
Taber's seedling, No. 29 Medium, roundish, flattened at base; flesh light brown; crisp, sweet, meaty, quality excellent.	
Eriobotrya japonica, China and Japan The "loquat" well known to everybody.	25 to 50
*Eugenia brasiliensis, Brazil	50
*Eugenia jambos, India The "rose apple,,' fruits large, rose scented.	50
Eugenia myrtifolia, east Australia	25 to 50
*Eugenia jambolana, India	50
Exceecaria sebifera, China The tallow tree, a sort of wax or tallow being extracted from its berries.	50
Ficus carica, southern Europe	25 to 1 00
*Ficus elastica, India The well known "rubber tree," supplying one of the best rubbers of commerce; grown also extensively as decorative and house plant,	25 to 1 00
*Ficus glomerata, India	25 to 1 00
*FICUS PALMERI, western Mexico Recently discovered by Dr. Palmer near Manzanillo, and afterward found also on the southern end of the peninsula of Ca ifornia; a medium sized tree bearing small, round, white figs, very sweet and pleasant.	2 00
*FLACOURTIA RAMONTCHI, India The "rambustan" or governor's plum, a dense leaved, spiny shrub, admirable for hedges; fruits purple, size of a plum.	50
*Guaiacum officinale, from Texas southwards A small tree with bright, light blue flowers, yielding the far-famed 'lignum vitæ,' employed in medicine as well as for other industrial purposes.	50
*Garuga pinnata, India	50
Hibiscus elatus. Cuba "Mountain mahoe," a large tree, vielding "Cuba bast," used also to bind cigar bundles, leaves and young shoots medicinal, wood very valuable.	50
**HYMEN.EA COURBARIL, West Indies A lofty tree, from which 'gum animi" is obtained.	50

	()	
	*Inga dulcis, Central America A bushy tree; pods containing white pulp rich in sugar. *Jatropha curves tropical Section	50
	*Jatropha curess tropical South American	
	*Jatropha curcas, tropical South America. Known also as Curcas purgans, or "physic nut," a powerful purgative, employed also for other uses in medicine.	50
	Common or English walnut; all leading varieties, among them the "Santa Barbarasoft shell," well known in the grantet.	
	*Lawsonia alba. India	
	*Lawsonia alba, India A shrub with pretty fragrant white flowers, yielding "henna," much used in Egypt and other countries by women to color their nails and by men to dye their beards.	50
	LITHRÆA MOLLEOIDES Chile	50
	prized "chicha" or brandy.	90
	*Macadamia ternifolia, Queensland	1 00
	*Macadamia ternifolia, Queensland	1 00
	**Mammea americana, West Indies The "Mamey" or Mammee apple, a tall tree, rich, glossy foliage; fruit iarge, brown, of a pleasant peculiar taste.	1 00
	**Maugifera indica, India	1 00
	**Maugifera indica, India The Mango, one of the most beautiful trees in existence, with delicious fruit, of which not less than 133 va leties are cultivated in India. Some of these are sure to succeed well in our Southern states.	1 00
	**MANIHOT GLAZIOUI, Brazil A tree yielding the "Ceara rubber" now extensively cultimated in	1 50
	in Ceylon up to the altitude of 4 000 fe t	1 50
	""Melicocca billion West Indian	50

	*MELALEUCA CAJEPUTI, India Yielding "cajeput oil." powerfully grometic and priced in	25
	and prized in medicing	25
	**MORINDA CITRIFOLIA var. BRACTEATA, India A small evergreen tree with large glossy leaves and white, sweet-scented flowers; its loots yield a much prized yellow dye.	50
	"Milliusons elengt India .	
		50
	**Musa, all over the tropics. The banana and plantain, of which we can supply the following species and varieties,	25 to 2 00
	"M, Cavendishii or sinensis,"	
	Dwarf, bearing very large bunches of excellent fruit.	
	"Orenoco," Tall growing, and the hardiest of all; fruit large, quality medium.	
	"Hart's choice,"	
	Not very tall; stalk and midrib tinged with red; fruit clear yellow thin skinned, of a very superior quality.	
	"Red Jamaica or Baracoa"	
	Growing very tall; fruit red; more tender than the preceding.	
1	Olea europaea, Southern Europe	
	The common olive; of this we can supply all the leading varieties, both for pickling and for oil making; detailed lists and prices for large quantities furnished on application,	

*Opunta ficus indica, Mexico	28
*Passiflora edulis, South America "Edible passion fruit," or "grenadilla," a most vigorous grower and immense bearer; fruit size of an egg, violet color. full of a very pleasant	28
**PASSIFLORA LAURIFOLIA, West Indies The "water lemon," a climber with splendid foliage and brown colored excellent fruits twice as big as the preceding.	1 00
**Passiflora quadrangularis, tropical South America A beautiful climber with rich foliage, very large, showy, strongly fr.grant flowers, and fruits attaining several pounds in weight.	25
*Persea gratissima, Mexico	50 to 1 00
**Phyllanthus distichus, India	25 to 50
PHYSALIS GLABRA, Lower California	50
Pinus pinea, Italy The picturesque umbrella or stone pine, so familiar in Italian landscapes, yielding delicately flavored nuts much used in confectionery, &c.	25 to 50
Pistacia vera, Asia Minor	50
*PITHECOLOBIUM MEXICANUM. There called 'chino," a small tree much prized for peculiar tanning mate ial it affords; recently discovered by Dr. Palmer, has been described and named by Dr. Rose, of the U.S. Dept. of agriculture.	50
*PROSOPIS DULCIS, Panama There called 'algarrobo," producing very long pods filled with sweet, white pulp In the Hawaiian Islands, where it was introduced by missionaries some 40 years ago, considered a blessing, for its quick growth and for the immense amount of fodder and fuel it supplies.	50
PRUNUS CAPULI, Mexico south to Peru. The "capulin," a very large growing kind of cherry, with flowers in spikes appearing in winter; blackish cherries in long bunches, bitterish but very pleasant both fresh and dried.	50
PRUNUS PUDDUM, Himalaya Coming from 8,000 feet elevation, is likely to stand some cold; not introduced before to cult vation, and likely to prove most interesting even for hybridising purposes, as it blossoms in November and ripens its fruit in	50
*Psidium Cattlayenum, Brazil The "trawberry guava" quite extensively planted in California.	25
*Psidium Guava, South America The so-called "lemon guava," mostly prized for jellies and preserves; we have on trial many varieties from different countries, and will communicate particulars on application,	25
*PSIDIUM GUAYAVILLAS, Brazil A distinct looking species: said to have smaller fruit but of superior taste.	25
*Psidium lucidum, Brazil	25
yellow, larger and of better taste. In Florida grown quite extensively.	

(17)	
Phormium tenax, New Zealand.	28
likely to attain economic interest in some parts of the country, owing to quality of its fiber, of which there is quite a large import into the U.S.	
Psoralea glandulosa, Chile "Culen" and also Jesuit's tea, from the aromatic properties of its leaves; blue and white flowers.	25
	-
*RANDIA, probably an undescribed species Sonora and lower California; there called "papache," a spiny shrub or small tree with white, fragrant gardenia-like flowers, and violet colored fruits size of an egg, pulp juicy and pleasant.	1 00
*ROTHROCKIA CORDIFOLIA lower California	50
po is of which are much relished as vegetable.	90
*Saccharum officinarum. India	25
sections where it would not be profitable enough for the extraction of sugar.	
**Santalum album, India	1 50
itles are manufact ed structure and which many Indian curios-	1 00
*SAPINDUS, probably a new species, lower California	50
*Sapindus saponaria, West Indies The "soap berry tree" now grown in most tropical countries; berries used to wash woolen goods, &c.	50
*SAPINDUS UTILIS, southern China. This is likely to prove one of the most valuable of our introductions. It is a mod rate sized deciduous tree with elegantly divided leaves bearing quite young large crops of berries which contain over 38 per cent of "saponine." In Algeria, where this tree is beginning to attract considerable attention, trees 8 to 10 years old are known to bear from 50 to 100 francs worth of berries every year, s) that a conservative estimate would allow for this country \$960 gross profit by the acre.	1 00
*SPONDIAS SOLANDRI, Queensland	25
A moderate sized tree, bearing earlie acid berries.	40
**Tamarindus indica, India The "Tamarind," a magnificent shade tree; pods full of pleasant subacid	25
purp.	
**Vanilla planifolia, tropical America	50
The true "vanilla" of commerce; a climber belonging to the orchid family; will succeed only where high temperature and permanent moisture are combined together.	90
**Zingiber offleinale, India Root yielding the true "ginger" of commerce.	25
N.B. Apple, Pear, Peach, Plum, and other so called deciduous fruit trees we are ready to supply in best varieties. Special lists and prices for quantities on application.	

TIMBER, SHADE AND ORNAMENTAL TREES.

The day is sure to come when our country will awake to the necessity of stopping the reckless destruction of its timber resources and of paying earnest attention to the problem of reforestation; and it would be desirable that by that time some positive experience had been gathered concerning trees best adapted to different localities and yielding timber that will command higher prices. Among the following many will be found well worth experimenting in our southern states. An increasing demand for choice shade and ornamental trees suitable to Park and Street planting has started already; of these a large selection is offered hereby. Figures affixed denote ultimate height attained by each kind under favorable conditions.

*ACACIA CAVENIA, Chile, 30 f	25
*Acacia dealbata, Australia, 100 f	25
*Acacia decurrens, Australia, 100 f	25
*ACACIA FLEXICAULIS, Southern Texas and Mexico, 50 f.	25
*Acacia longifolia, Australia, 30 f	25
*Acacia melanoxylon, Australia, 100 f	25
*Acacia mollissima, Australia, 100 f	25
*ACACIA PENNINERVIS, Australia, 40 f	25
*ACACIA PRAVISSIMA, Australia, 40 f	25
*Acacia pycnantha, Australia, 30 f	25
*Acacia retinodes, Australia, 30 f. Of the above the Chi iar and Mexican up cies are spiny, the first with orange yel ow, the second with light yellow fragrent flowers: the Australian species have no spines and generally very elegant foliage and beautiful, sweet scenied flowers of various shades of yellow; A. dealbata being the one grown so extensively for cut flowers in southern Europe: A. melanoxylon making a pyramidal dark green tree suitable for avenues: A. retioned shing literally everolooming; A. pyramidable sesides being one of the most showy flowered, is particularly rich in tannin. Many other recommendable Araci sof smaller size will be found under ornamental shrubs. Acacias as a rule will thrive in poor and dry soil without irrigation.	25
*ALBIZZIA LOPHANTHA var. NEUMANNI, Australia, 20 f. A variety with pink flowers of the common A. lophantha, run wild in California.	25
*ALBIZZIA OCCIDENTALIS, lower California, 20 f The recalled "palo escopeta," of elegant shape with cream colored fragrant flower- and very long pods.	25
*ALBIZZIA PROCERA, India, 150 f	25
	1 00

(10)					
*Araucaria Bidwillii, Queensland, 150f. The "bu ya-b mya," a truly magnificent tree, of which quite remarkable spe imens are to be seen in Los Angeles. *Araucaria excelsa Norfolk Island 150 c	. 2	00	to	5	00
*Araucaria excelsa Norfolk Island 150 c					
A striking spire looking tree so noticeable in Santa Barbara, where it hat been planted quite extensively	as			2	50
Araucaria imbricata, Chile, 100 f	0.4	20			•
Araucaria imbricata, Chile, 100 f. Going h re under the puzzling name of "monkey's puzzle" (there being n monkeys where it naturally grows); a curious and remarkable true, no such a fast grower as the above, but generally doing well on our Pacificant and will stand several degrees of frost. *Agathis robusta Queengland 120 f	2 (o t c)0	to	5	00
*Agathis robusta, Queensland, 130 f				۵	=0
*Agathis robusta, Queensland, 130 f. The corr ct name for "Dammar robusta;" a magnificent conifer with broad, laurel like leaves, yielding with its engeners the much prized	h d			2	50

Chamaecyparis Lawsoni, north California, 100 f The Lawson cypress; a most elegant and hardy tree, of which so many varieties are grown at present.	25	to	1	0	0
Cunninghamia sinensis, China, 100 f Resembling in habit Araucaria, Bidwilli, but, of lighter colors			2	5	0
thriving young specimens to be seen around Passadianter color, many fine					
Cryptomeria japonica, Japan, 120 f	25	to	1	04	0
Cryptomeria japonica, Japan, 120 f. The Japan cedar, yielding a much prized timber and making a beautiful avenue tree; does well here right on the coast.	20	00	1	01	

Cupressus Guadalupensis, Guadalupe island, 50		25
Cupressus funebris, Himalaya, 60 f	25 to 1	00
Cupressus macrocarpa, California, 150 f The well known Monterey cypress," invaluable indeed for h dges, screens and windbreaks, and with age making stately majest c trees, rivalling in appearance the celebrated Cedar of Lebanon; with the vein any position and any kind of soil.		25
Cupressus sempervirens, Asia Minor, 100 f		25
Cupressus torulosa, Himalaya, 100 f		25
*DALBERGIA SISSOO, India, 60 f		50
**DILLENIA SPECIOSA, Java and India, 40 f There considered to be one of the most gorgeous trees, both for its rich foliage and for its beautiful white flowers, fully nine inches across; hardy here.		50
*DIOSPYROS species, lower California, 30 f		50
EHRETIA ELLIPTICA, south Texas and Mexico, 30 f There called "anagua," a pretty evergreen tree with white flowers.		25
EHRETIA MACROPHYLLA, Japan, 30 f Similar to the above, but with much broader leaves.		25
*ELEODENDRON AUSTRALE, Queensland Quite remarkable for its pretty holly-like leaves.		50
ENTELEA ARBORESCENS, New Zealand, 30 f An exceedingly fast grower, with large roundish leaves.		25
*ENTEROLOBIUM CYCLOCARPUM, Cuba, 60 f		50
*ENTEROLOBIUM TIMBOIVA, Brazil, 150 f		25
*ERYTHRINA BOGOTENSIS, Columbia, 50 f		50
*Erythrina Caffra, Natal, 70 f		50
**Erythrina corallodendron, Mexico, 50 f		50
*ERYTHRINA INSIGNIS, south America, 100 f		50
*ERYTHRINA VIARUM, south America, 100 f All Erythrinas or 'coral trees," as they are commonly called, have generally spiny trunk and branches, and are covered with vermilion or scarlet flowers, exceedingly showly very rapid growers; some of the largest kinds are used to protect from the sun plantations of coffee and of cacao; hence their name in South America of "madre del cacao."		50

*Eucalyptus ficifolia, Australia, 30 f. No doubt one of the most handsome trees of moderate size to be grown in temperate regions for its compact growth, rich foliage, and chiefly for the profusion of its dazzling flowers. There are two distinct varieties; one scarlet, the other crimson, we offer both	25
the state of the s	
*Eucalyptus robusta, Australia, 100 f	25
well even in dry soil, without attaining, of course, its full size, and has been much planted of late as an avenue tree, for which purpose it is admirably suited.	20
**Ficus aurea, Florida, 60 f	25
**Ficus aurea, Florida, 60 f. A beautiful compact growing tree, with leaves somewhat like F. elastica, but smaller.	
*FICUS BENGALENSIS, India, 100 f	50
aerial roots from its branches that will strike into the ground and form new trunks; a moist, warm situation favoring this growth; leaves broadly oval, coriaceous with prominent veins, of a beautiful copper color when developing.	30
**Ficus Chauvieri, New Caledonia, 60 f Having the habit of F. elastica, but with broader leaves more oval shaped.	50
**Ficus elastica, India, 60 f	50 4- 1 00
and rapper tree mentioned arready under economic plants.	50 to 1 00
*Ficus glomerata, India and north Australia, 70 f Mentioned already as the above, makes a dense shade tree, its leaves having a most peculiar metallic lustre.	25 to 1 00
*FICUS INFECTORIA, India, 60 f	25 to 50
*FICUS INFECTORIA, India, 60 f	20 10 30
Ficus macrophylla, Queensland, 100 f	25 to 1 00
Ficus macrophylla, Queensland, 100 f. The "Moreton bay fig." a large and magnificent wide spreading tree, much planted in Southern california, where it appears quite at home, although for some unknown reason it does not perfect seed.	_20 10 1 00
"FICUS OFFOSITIFOLIA. India 50 f	25
wood.	
*FICUS PALMERI, northwestern Mexico, 30 f	1 00
and dry places	
*FICUS PRINCEPS, Brazil, 60 f. Having magnificent foliage, bronze and copper colored when young.	1 00
FICUS RELIGIOSA India 100 f	1 00
The "peepul," sacred to the Hindoos, who believe it embodies the divine triad—Vishnu, Brahma, Shiva. Leaves shining, suspended to long, flexible petiol s, so that the slight-st breeze will start them into movement, with a very distinct rustling sound.	1 00
ricus rubicinosa Australia 100 f	50
Perhaps the hardiest kind, and emitting very freely aerial roots; leaves thick, corlaceous, rather small, covered with a rusty tomentum underneath. A few large specimens are to be seen in Los Angeles and Santa Barbara. All above kinds of Ficus, with the exception perhaps of F. Palmeri, will prefer rich deep soil with splenty of moisture; but still, adapt themselves tolerably well to dry places.	
FRAXINUS VELUTINA, Arizona 40 f	25
planting, and well enduring drought tree, most, suitable for street	20
UTOVIII ea robusta Australia 150 f	25
Called also "silk oak," very much planted in California for the sake of its rapid growth, elegant fern like foliage and beautiful orange flowers. Will stand well some frost and severe droughts, but is likely to have its limbs broken by wind.	40

	1 00
*HEMICYCLIA AUSTRALASICA, Queensland, 40 f A spreading tree, with beautiful holly like leaves and red fruits.	1 00
**HERNANDIA OVIGERA, Mauritius, 40 f	2 50
A very remarkable tree with light green glossy leaves with a red spot in the	
center and large egg snaped whitish fruits.	50
Ilex latifolia, Japan, 30 f A beautiful evergreen with glossy, ovate leaves nearly as large as those of Ficus elastica. Will stand a good deal of frost.	
Ficus elastica. Will stand a good deal of frost.	50 to 1 00
Jacaranda mimosaefolia, Brazil, 40 f	00 00 2
planted in southern California, where it is quite hardy.	25
JUNIPERUS PHOENICEA, Mediterranean basin, 30 f	20
Growing quite compact and of dark green color; an invaluable plant for standing heavy sea winds and the actual spraying of salt water.	50
TIMIDEDIE DOOFRA Abyssinia and central Africa, 150 I.	- 50
A tall tree assuming with age the habit of the Cedar of Lebanot, extending to the higher mountains of central Africa, and recently discovered on Ki imandjaro; estimated to be hardy enough at Berlin, Germany, its wood having the same properties as the Virginia or Bermuda cedars used in the	
manufacture of pencils. *Wydio colycina India 25 f	25
*Kydia calycina, India, 25 f	1 00
*Leucadendron argenteum, Cape, 30 f at the Cape of	1 00
*Leucadendron argenteum, Cape, 30 1. The celebrated "silver tree," native only of Table mountain, at the Cape of Good Hope, and not easily grown elsewhere, with exception perhaps of southern California, where it generally does remarkably well. Our plants are from seed ripened in Montecito.	
LYONOTHAMNUS FLORIBUNDUS, islands of the Santa	5 00
Barbara channel, 50 f	3 00
Barbara channel, 30 1. This very remarkable tree, locally called "palo fierro," or "iron wood," has a straight trunk generally trial gular at the base, and reddish, stringy bark that peels off from top to bottom; the young growth is covered with leddish hair and exhales aromatic odor; the glossy, evergreen leaves are finely cut like ferns, and every branchlet is crowned with a terminal umbel of white flowers 4 to 5 inches in dismeter will make an exceedingly fine pot plant wherever it cannot be grown in the open.	
MACH ACRIENT TIPA BIVER PRICE TOUT	1 00
A magnificent shade tree, with light elegant foliage and handsome flowers, yielding one of the rosewoods of southern Brazil. Likely to be quite at home in our southern states.	
11 Atlantic States, 150 f	50 to 3 00
Acknowledged to be the hand-somest tree be blightly to the care and too generally known to deserve description. Needs deep alluvial soil and plenty of moisture to attain its full development; here it has become	
ever blooming.	25
A beautiful evergreen tree, yielding much prized timber, deriving his hame from the greediness cattle feed on its foliage. Like other Chilian trees, will do well on this coast.	
Melia azederach, India, 40 f the variety	25 to 1 00
Melia azederach, India, 40 f. Commonly known as 'pride of India" and 'pride of China," the variety originated in Texas "Texas umbrella," being more generally grown and known to everybody.	~0
*Melia companyirane India 40 f	50
Mostly differing from the above in being evergreen. A smaller everblooming kind known as M. semperflorens, mentioned under shrubs	1 111
***TOTTET IA CHAMPACA India 100 f	1 00
The "sampige" of the Hindoos who have a great veneration for it and plant it frequently around pagodas and shrines: flowers large, pale yellow and strongly scented.	

Parkinsonia aculeata, southwestern States and north Mexico,	
30 f. A thorny tree with feathery drooping branches and handsome yellow flowers; admirable for hedges; thrives in the driest places and can stand	25
much cold	
PARKINSONIA, TORREYANA, same region and size Known in northern Mexico as "palo verde," from the bright green color of its branches generally destitute of leaves; stands drought even better than the preceding.	25
*PELTOPHORUM FERRUGINEUM, north Australia, 100 f. Quick growing, with elegant foliage, rusty underneath and showy flowers in long panicles; wood very hard.	25
PERSEA LINGUE, Chile, 100 f	50
Pinus excelsa, Himalaya, 150 f	25
Pinus insignis, California, 100 f	25
*PINUS LONGIFOLIA, Himalaya, 100 f	25
Pinus pinea, Italy, 70 f	25 to 50
PINUS SINENSIS, China, 60 f	25
Standing well severe drought and heavy winds.	25
Pircunia dioica, River Plate, 50 f. Known also as Phytolacca dioica; the "Ombu" of the Pampas, being the only tree of any size growing the re; very fast grower and will succeed in any kind of soil; wood spongy and worthless.	25
PITHECOLOBIUM BREVIFOLIUM, southern Texas and	
northern Mexico, 25 f	25
**Pithecolobium saman, tropical south America, 60 f The "rain tree" or "guango," making a dense shade tree.	50
PITHECOLOBIUM spec., lower California, 30 f	25
Native name "palo catre," used for furniture making.	F0
PITTOSPORUM RHOMBIFOLIUM, Queensland, 80f Quite remarkable; rhomboid glossy leaves; large umbels of white flowers in summer, followed by oval yellow berries persisting through all winter and spring, and making it appear as if clothed in gold.	50
Pittosporum undulatum, New South Wales, 70 f	25
Very dense growing, with undulated leaves and clusters of large, white fragrant flowers in spring. Exceedingly suited also for tall hedges.	20
*REEVESIA THYRSOIDEA, southern China, 25 f	50
Leaves laurel shaped; showy white flowers in large umbels.	a.e.
Schinus molle, Peru, 40 f	25

**SCHIZOLOBIUM EXCELSUM, Brazil, 120 f		1	00
A noble tree, with leaves like a tree fern, huge panicles of pale yellow flowers.		_	
Sciadopitys verticillata, Japan, 150 f	00 1	to 5	00
Sequoia sempervirens, California, 300 f	25	to 3	00
*Sterculia acerifolia, New South Wales, 100 f The "flame tree," not uncommon in our gardens and thriving in the driest places where it will develop better its striking searlet inflorescences.	25 t	to 2	00
*Sterculia diversifolia, east Australia, 90 f	25 t	to 2	00
Known also as "Brachychiton populneum;" growing somewhat in the style of the Lombardy poplar; leaves curiously varying in shape; flowers produced in great prefusion, bell shaped, greenish white and red.			
SYNCARPIA LAURIFOLIA, Queensland, 200 f			5 0
**Thespesia populnea, India, 50 f			25
Tristania conferta, Queensland, 150 f			5 0
A beautiful shade tree with valuable timber, rich foliage and curiously frilled white flowers, here produced all the year round.			

FLOWERING AND ORNAMENTAL SHRUBS.

"Legion" indeed is the name of those already introduced and more or less common in our gardens; but what a much larger number are still to be obtained from different countries! A selection of the most desirable, between old and new, is offered below, ranging from small trees to low shrubs and to plants that, although herbaceous by birth, are assuming here half woody or suffrutescent habit. Every imaginable shade of color is represented among them, for every season, while not a few have here became literally everblooming. It is impossible altogether to give hints for the culture of plants so widely differing in origin and in constitution; but at the end of this section will be found grouped together, such trees and shrubs that will best answer to special purposes, and, being of similar nature, will need similar treatment.

Abel	ia r [*] upestris, China\$ Graceful habit: shining leaves: flowers white, tinged with pink.		25
*AB	UTILON LONGICUSPE, Abyssinia		25
	ria albicans, Australiawhite flowered.		5 0
Acac	eia armata, Australia		25
el	brachybotrya, "		25

Acacia prominens, Australia	25
" spectabilis excelsa, "	28
Acacia saligna, Australia	25
" salicina, "	25
" verticillata, "	25
All above are highly recommendable shrubs with graceful habit, elegant and mostly glaucescent foliage; save where mentioned their flowers are yellow of every shade and generally fragrant, produced in great profusion either in round heads single or bunched together, or in catkins, and chiefly during the wister months. Many of them are invaluable for cut flowers and not a few make admirable pot plants for growing in conservatories. Acacias take most willingly to any kind of soil, and will succeed without irrigation, making wonderful growth in a very short time: they will stand well heavy winds and intense heat, but only a few degrees of frost.	
Achania malvaviscus, south Texas and Mexico	25
*Acokanthera spectabilis, south Africa	50
ADENOCARPUS FRANKENIOIDES, Tenerife, Tall growing, broom like shrub, all covered with yellow blossoms in spring.	25
Amorpha fragrans, eastern Atlantic states	25
ANTHYLLIS BARBA JOVIS, Italy Elegant silvery foliage; straw colored flowers; will stand the he win s and grow under the sprays of salt water.	25
*ARDISIA HUMILIS, India	25
*ARDISIA POLYCEPHALA, India	25
*ARDISIA UMBELLATA, India	25
All of them with rich, shining leaves and pretty flowers, pink in the first, white in the other two.	
Atriplex halimus, Mediterranean region Low, spreading, grey foliage, admirable for hedges and for planting at the sea side.	25
Aucuba japonica, Japan	50 to 2 00
	50
Azara microphylla, Chile	
**BAUHINIA RICHARDSONI, Mauritius Curiously shaped leaves, like other Bauhinias, of which we have several on trial, all of them with with very showy flowers.	25
Berberis aquifolium, California	25
Berberis Darwinii, Chile and Fuegia	50

*BERBERIS JAMESONII, Ectador	50
yellow.	,
*Boronia megastigma, west Australia One of the choicest and most desirable Australian shrubs; flowers small, brown, bell shaped, deliciously fragrant.	1 00
*Bouvardia leiantha, Mexico	50 to 1 00
*Bouvardia jasminiflora, South America	50 to 1 00
*Bouvardia, garden varieties; detailed list and prices on	
application. These are most charming shrubs, flowering profusely, some of them fragrant: ranging from pure white to pink, deep scarlet, and light vellow.	
Buddleia globosa, Chile	50
Buddleia globosa, Chile Er et growing, long dark green leaves white underneath, and sweet scented orange flowers in globular heads: quite striking clumps of it to be seen in Golden Gate Park, San Francisco.	
Bursaria spinosa, Tasmania	25 to 50
Buxus sempervirens, southern Europe The well known "box" standing any sort of bad treatment and growing in any kind of soil.	25
*CAESALPINIA ECHINATA, Central America. Spiny: leaves shining, copper color when young: flowers yellow, showy.	25
Caesalpinia Gilliesii, River Plate finely cut leaves, deciduous: flowers ye'low and red: by some called "bird of paradise flower," name given also to Strelitzia Reginae.	25
*CAESALPINIA PANNOSA, Lower California	25
**Caesalpinia pulcherrima, West Indies known as "Barbadoes pride:" leaves bright green: beautiful flowers, varying from yellow to scarlet.	25
*Calliandra portoricensis, Portorico Acacia like foliage, very finely cut: flowers large, pure white, sweet scented.	25
Callistemon linearis, Australia	. 25
" rigidus, "	25
" speciosus, " Known under the common name of "bottle brush trees" on account of the appearance of their crimson or scarlet flowers: fast growers: will thrive in any soil and without irrigation.	2 5
CALOTHAMNUS QUADRIFIDUS, west Australia Somewhatsimilar to the above, but more graceful in habit; flowers scarlet.	25
*Calpurnia lasiogyne, Natal The 'Natal laburnum' from some resemblance to the European laburnum; flowers in elegant bunches, yellow but of different shape, and without fragrance;	50
CALYCOTOME VILLOSA, Italy	25
Much branched, spiny, covered with large, sulphur yellow pea shaped flowers very early in spring.	40
Camellia Japonica, Japan	50 to 2 00
The much admired Camellia, generally doing very well on this coast, without any particular care. We can supply a selection of the best European varieties; detailed lists on application.	

Caryopteris mastacanthus, China	25
Introduced in o Europe some sixty years ago, but in this country beginning to attract attention just now; its bluish flowers are produced during late	
summer and fall,	0.5
CASSIA ARTEMISIOIDES, central Australia	25
Pretty silvery grey fo iage, most finely divided, flowers deep yellow; will stand any amount of drought and some frost.	
CASSIA CORYMBOSA, River Plate	25
* " SCHINIFOLIA, Australia	25
" tomentosa, Mexico	25
All of them with yellow flowers, very showy; the last being a good winter bloomer.	
CELOSIA FLORIBUNDA. Lower California	25
Shrubby, 8 feet high or more; very showy when in bloom; black shining seeds used for Canary birds.	
*Cestrum aurantiacum, Guatemala	25
*Cestrum diurnum, West Indies	25
*Cestrum elegans, Mexice	25
*Cestrum nocturnnm, Jamaica	23
Chilopsis saligna, western southern States and north Mexico,	25
Called "desert willow" and "mimbres;" deciduous; leaves willow-like; flowers like a Bignonia, pretti y fringed, purple and white.	
Choisya ternata, Mexico	25
Very pretty and compact: much grown in France for derists' use: leaves trifoliate, shining, pure white flowers in terminal umbels, slightly fragrant and looking like orange blossoms. Will stand some frost.	
*Chorizema varium, Australia	50
Together with its congeners a great favorite in European conservatories; a low shrub, here everolooming; flowers pea shaped, red and orange.	
Cistus creticus, Candia	25
Cistus cyprius, Cyprus	25
CISTUS HETEROPHYLLUS, Algeria	25
CISTUS PARVIFLORUS, Greece	28
Commonly known as "rock rose;" dwarf, aromatic shrubs; flowers large; rose shaped, white in the first, rose pink in the fourth, and purple in the other two; admirably adapted for rock work; prefer dry places and will	
*CLERODENDRON TOMENTOSUM, New South Wales	25
A tall shrub; leaves velvety; flowers white in large corymbs	20
Clianthus puniceus, New Zealand	25
There called "parrots-bills;" an elegant half trailing shrub with feathery leaves and large brick red flowers; grows to perfection on this coast, as shown by the striking clumps in Golden Gate Park, San Francisco, there biooming all through the winter.	
COLQUHOUNIA VESTITA, Himalaya Low growing, woolly; flowers in whorls of a peculiar red orange color.	25
CONVOLVULUS OLEOIDES, Greece	25
A charming little shrub; stems slender, silvery, here covered all through the year with a profusion of salver-shaped bright rose flowers. Ought to make a good pot plant.	

COPROSMA ACEROSA, New Zealand	2
Low, spreading; leaves minute: flowers white small sky blue berries	
Coprosma Baueriana fol. var, New Zealand	25 to 50
*CORDIA FRANCISI, Brazil Tall growing, with dark green leaves and white flowers.	, 2
Coronilla glauca, southern Europe. One of the most common shrubs in gardens of Southern California, bearing its pretty yellow flowers all through the year.	28
This has a more trailing habit and more glaucous leaves, harmonizing beautifully with the charming white and pink flowers produced all the year round. Admirable for cut flowers, and likely to become a good florist's plant.	2
**CRYPTOLEPIS LONGIFLORA, India Dwarf and compact growing with long leaves tinted with red; tubular white flowers as in in Bouvardia jasminiflora; sure to make very nice pot plants.	50
Cytisus albus, Portugal	25
First white flowering; second having flesh colored flowers	$\frac{25}{25}$
CYTISUS ATLEYANUS, Europe	* 28
CYTISUS CAPITATUS, Europe	25
All three yellow flowered.	25
*Cytisus linifolius, Spain Silvery foliage; yellow flowers.	25
*CYTISUS PALMENSIS, Canary Islands. Stems and branchlets erect, thread-like; from November to June covered with thousands of pure white, deliciously scented flowers; first rate for pot growing as well as for cut flowers.	50
Cytisus racemosus, garden hybrid? Flowers yellow in terminal spikes; much used as a not plant in the cast	25
Dapline odora, China and Japan	50
Daphne odora rubra, China and Japan	50
Daphne odora variegata, China and Japan The white flowered Daphne and varieties with pink flowers and variegated leaves are to be sure, among the most desirable shrubs for winter blooming, and on this coast do admirably well eyen in full sup-	50
Datura cornigera, Brazil	25
Datura suaveolens, Mexico	
*Datura suaveolens, Mexico Commonly calle i "floribondia," and "angel's trumpet," from the shape of their large white flowers exquisitely fragrant, chiefly at night; very popular plants here, and everblooming. *Datura sanguines Poru	25
More slender growing; flowers large, orange vellow scent'ess	25
Dius Iragrans, Cape of Good Hope	25
very nice pot plants.	20
Very fast grower; gay green roundish leaves, flowers white changing to	50

"Duranta Flumieri, south America	40
An elegant shrub, literally covered with pretty blue flowers in summer, followed by bright yeliow berries persisting several months, and very ornamental.	
*Duranta Plumieri fl. albo	25
A pure white variety of the same, very pretty.	
DUVAUA DEPENDENS, Chile	25
Dark green aromatic leaves; flowers whitish.	
EDWARSIA CHILENSIS, Chile	28
" GRANDIFLORA, New Zealand	25
" MACNABIANA, " "	25
" MICROPHYLLA, Chile	25
All with pretty foliage, large, yellow, pea shaped flowers.	
Erica mediterranea, southern Europe The well known "heath," bearing a profusion of small, light pink flowers.	50
Erythrina cristagalli, Brazil	25
Erythrina herbacea, Florida	25
*Erythrina speciosa, West India	25
Smaller growing "coral trees," blooming well if cut back every year; all of them with dazzling vermilion flowers.	
Escallonia Berteriana, Chile	25
Escallonia floribunda, south America	25
*Escallonia organensis, Brazil	25
	25
Escallonia rubra, Chile	
*Euphorbia fulgens, Mexico	25
tems gracefully arching, with gay green leaves: flowers bracts bright scar- let.	.~
*Euphorbia pulcherrima, Mexico	25
Popularly known as "Poinsettia" and in Mexico as "flor de Pascua," for its being at its best for Christmas.	
*Euphorbia splendens, Bourbon island	25
Exochorda grandiflora, China.	25
The correct name for Spiraea grandiflora, one of the prettiest winter blooming shrubs; doing admirably on this coast	
Fabiana imbricata, Chile There growing at high elevation and in dry places; a pretty shrub, quite popular here, often mistaken for an Erica, on account both of its leaves and of its white tubular flowers.	25
*FLEMINGIA CONGESTA, India	50
*Fuchsia arborescens, Mexico	25
Known also as F, syringaetlora, for the resemblance of its flower bunches to the common l lac: a truly beautiful plant, excellent for winter blooming.	
Fucheia corymbiflora, Peru.	25
Large light green leaves: long scarlet flowers in bunches.	

Fuchsia—garden varieties A selection of the very best of this most popular shrub, quite at home on our coast, and easily grown.	25
Gardenia citriodora, Natal	25
Gardenia florida, China	25
*GARDENIA ROTHMANNI, Natal	25
*GARDENIA THUMBERGI, South Africa Dwarf growing; the first with pale yellow, the second with white flowers.	25
GENISTA ÆTHNENSIS, Sicily	25
*Genista Canariensis, Canary islands	25
*GENISTA FLORIDA, Spain	25
*GENISTA FEROX, north Africa	25
*GENISTA MADERENSIS, Madeira	25
*GENISTA MONOSPERMA, Sicily	50
*GENISTA UMBELLATA, north Africa	25
GENISTA VIRGATA, Madeira Both yellow flowered: the second hardy at Kew, where it is considered as the best of yellow flowered species.	. 25
GLOBULARIA ALYPUM, Greece	25
GOODIA LOTIFOLIA, Australia	25
*GORDONIA ANOMALA, Hong Kong	50
*GOSSYPIUM DAVIDSONI, lower California	50
**Gynura aurantiaca, Java	25
HAKEA LAURINA, Australia	25
Hakea pugioniformis, Australia	25
A most curious looking plant; at some distance simulating a pine; flowers whitish.	
HAKEA ULICINA, Australia	25
HALLERIA LUCIDA, south Africa A pretty shrub of graceful hubit; elegant shining leaves and scarlet flowers.	25
HALIMODENDRON ARGENTEUM, Siberia	25
*Hardenbergia monophylla, Australia	25

Hardenbergia monophylla alba, Australia Very pretty winter blooming shrubs; the first with purple, the second with pure white pea shaped flowers, in graceful bunches; first rate also for flor-	25
#HELICHRYSUM DIOSMÆFOLIUM, Australia	50
*HIBISCUS HETEROPHYLLUS, Queensland Tall growing, rich, variously shaped foliage: large white flowers with deep crimson eye, very showy and free bloomer.	25
*Hibiscus rosa sinensis, south China	25_to 50
HOVEA LONGIFOLIA, Australia	25
Hydrangea hortensis, Japan	25
HYMENOSPORUM FLAVUM, Queensland	50
HYPERICUM FLORIBUNDUM, Madeira	25
*Iochroma fuchsioides, Ecuador	25
*Iochroma lanceolatum, south America	25
*Jacquinia armillaris, West Indies Pretty evergreen with white fragrant flowers.	25
**Jatropha multifida, south America	50
LABURNUM ADAMI, garden hybrid	25
LABURNUM VULGARE PARKSII, garden hybrid An improved variety with much larger bunches of flowers than common Laburnum.	25
Lagerstroemia indica, north India and China Deciduous, tall growing and standing many degrees of frost: in this country known as "crape myrtle," beautiful for summer blooming: flowers crimson, purple or white, according to variety.	25 to 50
**LAGERSTREMIA FLOS REGINÆ India	1 00
*Lagunaria Patersoni, Norfolk island	25
Lantana, garden varietiesQuite common but very useful for dry places, hedges and slopes: colors exceedingly varied,	25
Laurus nobilis, southern Europe	25 to 50

LAVANDULA STECHAS, southern Europe Low growing and aromatic like the following; dark purple flowers in terminal heads,	25
Lavandula vera, southern Europe Common lavender, one of the most popular plants, excellent for borders and dry places and standing cold well.	25
*Leonotis leonurus, south Africa The "lion's tail" very showy for its orange flowers in whorls, here pro-	25
duced all the year round. LEPTOSPERMUM FLAVESCENS, Australia	25
Leptospermum laevigatum, Australia	25
Leptospermum scoparium Middle sized shrubs, with pretty flowers all along the stems, first and second white, third lilac: this last being the one known as "australian tea:" all stand drought well.	25
LEPTOSYNE GIGANTEA, Santa Cruz Island Stout whitish trunk, crowned with feathery leaves: bright yellow sweet secuted flowers in lateral umbels; a striking plant for lawns, as also for pot culture.	25
*Leucaena glauca, southern Texas, west Indies, etc In Florida known as white popinac: a very rapid grower; elegant acacla like foliage, and whitish flowers.	25
*Libonia floribunda, Brazil A very pretty dwarf shrub well adapted for pot growing, but here doing finely in the open; during winter covered with tubular, scarlet and yellow flowers.	25
Lippia citriodora, Peru and Chile The most popular "lemon verbena," on this coast growing to very large size; known also as "Aloysia citriodora," will stand some frost.	25
*Lobelia laxiflora, Mexico	25
*Loeselia coccinea, Mexico	25
*Lopezia coronata, Mexico	25
*Lotus Jacobaeus, Cape Verde islands	25
*Mackaya bella, NatalLeaves glossy: flowers large, funnel-shaped, lavender color.	.25
Magnolia fuscata, China Tall shrub or small tree, compact growing; pretty foliage: flowers rather small, not showy, but exquisitely fragrant: by some in this country called "banana shrub,"	25
MARGYRICARPUS SETOSUS, Peru and Chile Low growing, pretty heather like foliage, and small white berries; very good for rock work.	25
MEDICAGO ARBOREA, southern Europe "Moon trefoil" and "tree alfalfa;" stems woody, center as black and hard as ebony; foliage bright green: flowers orange yellow, produced nearly all the year round;	25
Melaleuca decussata, Australia	25

Melaleuca leucadendron, Australia	25
Larger growing: trunk and branches with white bark peeling off; flowers white.	
Melaleuca hypericifolia, AustraliaLeaves broader than in the preceding; flowers bright scarlet.	25
MELALEUCA MICROMERA, Australia Leaves very minute, embracing the branchlets, curiously looking like some juniper; flowers sulphur yellow. All Melaleucas or "bottle brush trees," as they are sometime called from the arrangement of their flowers in a sort of cylindrical brush, are great bloomers, and precious indeed for standing winds and drought; will also endure some frost.	25
Melia semperflorens, Asia? Dwarf growing species, similar to the so-called "pride of India;" flowers lilac, fragrant, all the year round.	25
Melianthus major, south Africa	25
Melianthus minor, south Africa	25
Both with very ornamental foliage and strange looking flowers, brownish in the first, dark brown in the second: each of them secreting a large quantity of honey-like liquid, from which their name is derived.	
MIMOSA ACANTHOCARPA, south American	25
MIMOSA SPEGAZZINI, River Plate Both spiny and with Acacia-like finely cut leaves, exceedingly sensitive in the second: flowers light purple in globular heads.	25
**MORINDA CITRIFOLIA BRACTEATA India Leaves oblong, shining: flowers pure white.	25
Muhlembeckia platyclada, Solomon island	25
Myrtus communis, southern Europe The classic "myrtle" once sacred to Venus: its pretty white flowers being produced here all the year round.	25
Myoporum laetum, New Zealand	25
Myoporum verrucosum, Australia?	25
Quick growing, with shining leaves as if perforated with translucid dots: pretty white flowers and purple barries: among the best plants to grow near the sea.	20
Nandina domestica, Japan	25
Nerium oleander, southern Europe	2
Olea fragrans, Japan	2
Oncoba Kraussiana, Natal	:
*OREOPANAX PEDUNCULATUM, Guatemala?	25
*OXYLOBIUM CALLISTACHYS, Australia A very pretty shrub: leaves light green: flowers in well furnished spikes,	50
bright yellow.	

*Pentas carnea, south Africa	25
PHLOMIS FRUTICOSA, southern Europe	25
Stems and leaves woolly; flowers in whorls, bright yellow: winter blooming, will stand drought and heavy sea winds.	20
Pimelea decussata, Australia	25
PIMELEA LIGUSTRINA, Australia Exquisitely pretty shrubs, of compact growth, first with pink, second with white flowers, doing very well on this coast.	25
Pittosporum crassifolium, New Zealand	25
PITTOSPORUM PHYLLIRAEOIDES, Australia	1 00
Pittosporum tenuifolium, Australia	25
Pittosporum tobira, China and Japan	25
*PLECTRONIA SPINOSA, south Africa	25
	50
Pleroma macranthum, Brazil. Slender growing, the large deep violet flowers appearing mostly on top of roots: a beautiful plant, doing very well on this coast as far north as San Francisco.	
**PLUMIERIA ACUMINATA, tropical America	50
**PLUMIERIA HYPOLEUCA, tropical America	50
Both with fleshy stems, dark green leaves and large white flowers in umbels, exquisitely fragrant; known also as "frangipani:" will thriv hottest places, to be kept dry in winter.	
**Poinciana regia, Madagascar In West Indies known as "flamboyant:" very elegant foliage: flowers bright scarlet in large panicles: will succeed only in very warm places and will stand no frost,	50
Poinsettia—see above under Euphorbia	
Polygala myrtifolia, south Africa	25
*POLYGALA VIRGATA, south Africa	25
*POLYGONUM ELEGANS, southern Italy	25
dwarf; wiry stems covered with myriads of small white flowers very effect- ive for rockeries as also for bouquets.	
*POTERIUM SPINOSUM, Greece peculiar looking little shrub with minute leaves, flowers and berries, all tinted of different shades of green and red.	25
Raphiolepis japonica, Japan	25
*RAUWOLFIA SINENSIS, southern Chinaleaves shining; flowers white.	25
*Reinwardtia tetragyna, India	50

Remwardia trigyna, India	90
the correct names for Linum tetragynum and L. trigynum, both much admired pretty little plants, covered all the year round with golden yellow flowers, similar in shape to the common flax, but larger.	
*RHODOLEIA CHAMPIONI, Hong Kong	1
*RHODORHIZA FLORIDA, Tenerife	5(
slender growing; gracefully bending stems bearing long panicles of pink- ish white convolvus like flowers: wood and roots being highly rose scented.	
Ribes speciosum, California Stems covered with dense reddish prickles; elegant foliage, flowers blood red, fuchsia-like, hanging down all along the stems; one of the prettiest among winter flowering shrubs.	25
Robinia hispida, eastern United States	25
Rosmarinus officinalis, southern Europe	25
Rosmarinus officinalis, southern Europe	
	25
Salvia coccinea, Mexico	
Salvia leucantha, Mexico	25
*SALVIA SESSEI, south Mexico and Guatemala	25
Arborescent; with aromatic bright green foliage and very conspicuous ver- milion orange flowers, in large terminal spikes; late bloomer; a most remarkable plant.	
Salvia splendens, Mexico	25
*SCHOTIA LATIFOLIA, south Africa	50
flowers in large panicles.	
SCHRANKIA UNCINATA, Texas, Arizona and northern	
Mexico. Very prickly all over: leaves exceedingly sensitive, pretty rose flowers in round heads.	25
*SECURINEGA LEUCOPYRA, India	50
A spiny shrub, with sweet white berries, suitable for hedges.	
SEDUM SPATHULATUM California	25
A giant among Sedums or "stonecrops" growing several feet high; leaves fleshy, cylindrical, bright green; tall panicles of golden yellow star-like flowers; one of the most striking plants in our gardens during winter time.	
Solanum aviculare, New Zealand Leaves largely deeply cut; flowers blue; berries oval orange red.	25
*Solanum giganteum, India	25
*Solanum indicum, India	25
	25
Solanum marginatum, Abyssinia	20

*Solanum pyracanthum, Madagascar	25
*Sparmannia africana, south Africa Making a handsome foliage plant; but not less valuable for its pretty white flowers produced in winter.	25
Spartium junceum, south Europe The so-called "Spanish broom;" quite at home on this coast, where its bright yellow fragrant blossoms can be picked every day in the year. Stands drought well and many degrees of cold.	25
Spiræa prunifolia flore pleno, China and Japan	25
Spiræa cantoniensis, China. Both well-known and popular shrubs; first with double flowers: second bearing the name of "bridal wreath;" here almost evergreen and everblooming.	25
*STACHYTARPHETA MUTABILIS, Brazil	25
*Streptosolen Jamesoni, Ecuador Known also as Browallia Jamesoni; to be sure one of the handsomest and most striking blooming shrubs, attaining quite a large size, with myriads of yellow and orange flowers, produced for many months in the year. Will do best in open sunny places, and with liberal treatment.	. 25
Swainsona galegaefolia, Australia	25
Swainsona galegaefolia alba, Australia	25
TAGETES LACERA, lower California	25
Tamarix plumosa, Japan Probably the best of all kinds of Tamarises, for its truly feathery foliage and inflorescences of beautiful rosy pink color; this, like its congeners, will grow in any soil, even saling or alkaline, will stand drought, and many degrees of cold	25
	25
*Tecoma capensis, south Africa	
*Tecoma Smithii garden hybrid	25
Obtained a few years ago by a nurseryman of that name in Adelaide, south Australia, by crossing the preceding with T. velutina—considered to be a mere variety of the following. Our plants are from seed received from the originator, and are beautifully varied in the shape of the leaves as well as in the mingling of scarlet and yellow in their flowers.	
*Tecoma stans, southern Texas and northern Mexico 'Palo de arco,' shrubby not climber: a magnificent bloomer: flowers golden yellow, trumpet-shaped, delightfully fragrant.	25
*Thevetia neriifolia, West Indies	25
Ulex europaeus, Europe The well-known "gorse" or "furze," doing very well on this coast, its yellow flowers appearing in almost every month of the year.	25
Veronica Hulkeana, New Zealand	25

Veronica macrocarpa, New Zealand	25
Veronica salicifolia, New Zealand	25
Veronica, garden varieties, of which we can supply the best. All doing admirably well along our coast and everblooming, nothing better for planting in exposed places by the sea.	
Viburnum opulus sterilis, Europe The old-fashioned "snow ball," doing very well here.	25
Viburnum tinus, southern Europe	25
VIMINARIA DENUDATA, Australia Quite remarkable; long wiry pendulous branches, with leaves reduced to very long petioles, and orange yellow flowers in terminal racemes.	25
*Wigandia imperialis, Mexico	25
*Wigandia macrophylla, Caracas	25
Xanthoceras sorbifolia, Manchuria	25

TABLE A.

Trees and Shrubs that will grow without Irrigation, even where the Annual Rainfall will not exceed 8 or 10 Inches.

Acacia, all mentioned above. Casuarina, ditto.

Cupressus Guadalupensis.

macrocarpa.

sempervirens, Grevillea robusta.

Juniperus phoenicea.

Parkinsonia aculeata.

Torreyana.

Pinus insignis.

pinea.

sinensis.

Schinus molle.

Sterculia acerifolia.

diversifolia.

Tristania conferta.

Atriplex halimus.

Callistemon, all mentioned. Calothamnus quadrifidus.

Calycotome villosa.

Cassia artemisioides.

Cassia tomentosa.

Streptosolen Jamesoni.

Swainsona, all mentioned.

Tecoma, ditto.

Thevetia neriifolia.

Veronica, all mentioned.

Viminaria denudata.

N. B.—Description and degree of hardiness of each kind are given above.

CLIMBING AND TRAILING PLANTS.

These are general favorites in our country, on account of their beauty being constantly under our eyes, and also because we cannot restrain from considering them as an integral part of our homes. Of many it is quite true that man can enjoy them better under such domesticated conditions, than in their native habitats, where impelling struggle for life pushes them up to the top of the loftiest trees, there offering gorgeous displays of colors, enjoyable only by creatures provided with wings. No wonder, therefore, that the number of such plants gathered in our gardens from every country, is already large, and that we feel bound to pay special attention to increase it more and more with valuable additions. Climbers or "Vines," as they are commonly called, are generally very fast growers, and with few exceptions, will need plenty of nourishment and water. Among them some will be more suited to adorn verandahs and houses, while others will show better if let to run at random on large trees; some will be the right thing for covering walls and fences, or for concealing unsightly buildings; some will find best employment among rocks or on sloping ground. In every case a judicious selection is recommendable in order to attain a succession of bloom and to avoid offensive association of colors. In the list that follows, the predominant color of each kind is carefully given, and season of blooming when possible.

Tibitus procuoritus, india		20
Flowers light pink, pea-shaped; seeds scarlet, shining, with black eye, used for necklaces, rosaries etc.		
*Adhatoda cydoniaefolia, Brazil		25
*Agdestis clematidea, Mexico		25
*Akebia quinata, Japan Leaves in fives; flowers dark purple, fragrant; quite a free grower.		25
ALOE CILIARIS, south Africa. Stems slender; leaves gay green, ciliated at their base; flowers very profuse bright searlet, keeping long when cut. Lately has begun to be grown on the Riviera for export of cut flowers during winter.		50
Ampelopsis quinquefolia, southern Atlantic states The will-known Virginia creeper; fast grower and admirable for the rich red color assumed by the leaves before they fall down.		25
Ampelopsis tricuspidata, Japan		25
*Antigonon leptopus, Mexico	50 to 1	00

of the prettiest climbers known, for the mass of bright pink flowers it dis-

plays during summer: prefers sunny and very hot places.

20

*Aristolochia elegans, Brazil A truly elegant plant, for its pretty foliage and curiously mottled flowers, free from any bad smell that make other Aristolochias rather objectionable.		25
**Artabotrys odoratissima, Java. Leaves glossy dark green: flowers reddish brown, powerfully scented, the celebrated "ylang-ylang" being extracted from them.		50
*Asparagus plumosus, south Africa		25
*Bignonia alba, south America		50
*Bignonia argyreo violascens, south America		50
*Bignonia magnifica, Columbia		50
*Bignonia Manglesii, Australia		25
Bignonia speciosa, River Plate Leaves ovate, shining; flowers large delicate mauve, finely veined deep purple.		25
Bignonia Tweediana, River Plate		25
*Bignonia venusta, Brazil One of the most desirable climbers we have in our gardens; covering roofs, arbors, etc., with a sheet of the richest orange from September to April. Other kinds see under "Tecoma."		25
BILLARDIERA CYMOSA, south Australia		25
*Bougainvillea glabra, Brazil	25 to 1	00
*Bougainvillea lateritia, Brazil	50 to 1	00
*Bougainvillea Sanderiana, Brazil	50 to 1	00
*Bougainvillea spectabilis, Brazil. Deservedly considered among the showiest blooming climbers, Bougainvilleas will thrive better in sunny warm places with plenty of room for roots and for the shoots to run over: second named has flowers of a dull brick color, very pleasant, the others of different shades of magenta color, being a mass of bloom almost all the year round.	25 to 1	00
Boussingaultia baselloides, Peru The popular "Madeira vine:" tuberous rooted stems, deciduous; leaves fleshy; bunches of minute, whitish, seented flowers in the fall.		25
*BUDDLEYA MADAGASCARIENSIS, Madagascar	1	00
Most vigorous grower, large leaves, shining above, white underneath: long trusses of yellow flowers produced all tarough the winter; sure to become a great favorite in our southern states, as it is already on the shores of the Mediterraneau.		
*Cereus Macdonaldiae, Honduras		25
yellow buff color, vanilla scented, and opening at night during summer.		25
**Chlorocodon Whithei, south Africa		20

*Cissus incisa, southern Texas and Mexico	2 5	5
CLEMATIS CAMPANIFLORA, Portugal Pretty, bell-shaped, light blue flowers in spring.	25	Ď
Clematis coccinea, Texas	25	5
	25	5
Clematis crispa, Texas Both very free growers and almost everblooming; flowers fleshy, nearly globular, scarlet in the first, violet in the second; will stand much frost.		
CLEMATIS DRUMMONDI, southern Texas and Mexico A vigorous grower too, with white flowers; seeds with plumose tails four inches long.	25	5
CLEMATIS MONTANA GRANDIFLORA, Himalaya Unrivaled for its gorgeous display of white star-shaped flowers in early spring: very hardy.	25	5
Clematis paniculata, Japan	25	5
Clematis, garden varieties	25 to 1 00)
Clematis, garden varieties	20 10 1 00	
**Clerodendron Balfouri, tropical Africa Flowers white and scariet; one of the most admired climbers, suitable also for pot culture.	25	ŏ
Cobaea scandens, Mexico	25	ă
Cobaea scandens, Mexico		
CONVULVULUS MACROSTEGIUS, south California islands	50)
An exceedingly vigorous trailing plant, with woody stems; leaves dark green; flowers large, cream white, sometimes flashed with pink, five of them on each peduncle in succession: an admirable plant for large rockeries.		
Convolvulus mauritanicus, north Africa	25	5
Compact growing; prefty blue flowers, produced in the greatest profusion; suitable also for hanging baskets.		
CONVOLVULUS VILLOSUS, California Hardly trailing; stems and leaves appearing whitish from the fur they are covered with: flowers cream color; a very pretty border plant.	25	5
*DIOCLEA GLYCINOIDES, River Plate	50)
An exquisite climber of moderate growth; leaves trifoliate, shining, large pea-shaped flowers in bunches like the common Wistaria, of a bright scarlet color.		
*Dolichos lignosus, India	25	5
Wrongly known in this country as "Australian pea;" a very rapid grower, bearing an immense number of pretty pea-shaped purple flowers.		
Eccremocarpus scaber, Chile	25	5
EPHEDRA TRIFURCA, Arizona and California A curious trailing plant with no leaves, resembling some of the so-called horse tails; quite suitable for rock work.	25	1
*FAGELIA BITUMINOSA, south Africa	25	-
Fast grower, but of moderate size; leaves covered with clammy hairs; flowers pea-shaped, yellow, tipped with violet.	40	

Ficus stipulata, China and Japan. Quite remarkable, attaching itself to walls, ricks, boar's, and even glass; hiving smaller leaves on its barren stems, much larger on those bearing fruits, which are woody and not eatable.	25
	25
Fragaria Indica, India Astrowberry, with golden yellow flowers and red, showy, but tasteless fruits, excellent for hanging baskets.	20
Gelsemium sempervirens, from Virginia southwards	25
Gelsemium sempervirens flore pleno	25
Hedera helix chrysophylla, southern Europe A variety of the common ivy, with golden berries, very p etty during win er.	25
*Hoya carnosa, south China and Queensland The old fashioned "wax plant;" flowers light pink, deliciously scented, everblooming here.	27
*Ipomaea grandiflora, India	25
*Ipomaea Learii, Ceylon	25
*Ipomaea Mexicana, Mexico	25
*IPOMAEA QUINQUEFOLIA, south America	50
*Ipomaea Sellowii, Brazil	25
*IPOMAEA UMBELLATA, River Plate Pretty foliage; flowers yellow in umbels.	ลิบ
*Jasminum Azoricum, Madeira	25
*Jasminum grandiflorum, India	25
JASMINUM HUMILE, India	25
Jasminum revolutum, Himalaya	25
*Jasminum Sambac, India	50
*JASMINUM SIMPLICIFOLIUM, Australia	25
*Jasminum undulatum, China. The well known and sopular Jasmines, to be sure among the best climbers; all white flowered, except J. humile and J. revolutum, which have yellow flowers.	25
Lapageria rosea, Chile	2 50
Lapageria rosea, Chile. One of the noblest and choicest climbers, belonging to the same order as the lily: flowers bright crimson; does well right on the coast, but will prefer shady places where the atmosphere will never become dry.	
LARDIZABALA BITERNATA, Chile	50
Lathryrus splendens, southern California. Will named the "Pride of California;" looking somewhat like a sweet-pea, but percualat; flowers large, of the brightest crimson, produced all winter: will look at its best if allowed to run on large bushes,	25

LONICERA CAPRIFOLIUM, Europe The typical "honeysuckle," having large white and yellow flowers, the most fragrant among its congeners; deciduous.	25
LONICERA IMPLEXA, Italy	25
*LOTUS BALAMBENSIS, Abyssinia	25
*LOTUS CANARIENSIS FLORIBUNDUS, Canary islands	25
*Lotus peliorynchus, Canary islands	25
*LYCIUM RICHI, lower California	25
*Mahernia glabrata, Cape of Good Hope Trailing, covered with myriads of bill-shaped, bright yellow flowers, exhaling the most exquisite perfume; very desirable also as a pot plant.	25
Mandevilla suaveolens, Chile	25
*Manettia bicolor, Brazil	50
*Manettia cordifolia, Brazil	25
Maurandia erubescens, Mexico	25
Maurandia semperflorens, Mexico	25
Muhlembeckia complexa, New Zealand	25
Myrsiphyllum asparagoides, south Africa The correct name for the so-called "Smilax," so extensively used for florists' use, here doing finely in the open.	25
Passiflora coerulea, south America	25
Passiflora edulis, Brazil	25
*Passiflora Hahni, Mexico	50
**PASSIFLORA LAURIFOLIA, West Indies Flowers red and violet, fragrant; fruit large, brownish yellow, much prized,	50
**Passiflora ligularis, Peru, Ecuador, etc	50
*Passiflora manicata, Peru	25

**Passiflora quadrangularis, tropical America Leaves large, broadly ovate; flowers very large, blue crimson and purple, very fragrant: fruit edible, several pounds in weight.	25
**Passiflora racemosa, Brazil	1 00
*PASSIFLORA RADDIANA, Brazil	50
Flowers blood color with purple corona, borne on very slender pedicels. All above "Passion flowers" rank among the most free growing climbers, their vigour, as seen here, being really wonderful, and the beauty of their flowers being unsurpassed.	
PENSTEMON CORDIFOLIUS, southern California	25
*Pereskia aculeata, West Indies	25
Phaseolus caracolla, Peru "Caracol" and "snail vine" from the curious appearance of its fleshy, light purple and yellowish flowers, exceedingly fragrant.	25
Physianthus albens, south Brazil This has been called the "cruel vine" for its whitish flowers entrapping moths and butterflies; a very vigorous grower.	2.5
*Physianthus graveolens, Brazil	25
PITHECOCTENIUM CLEMATIDEUM, River Plate	25
PITHECOCTENIUM MURICATUM, Mexico Both vigorous growing, Rignonia like climbers: flowers large, somewhat woolly, pure white in first, yellow and white in the second.	25
*Plumbago capensis, south Africa	25
*Plumbago capensis alba, south Africa	25
**Plumbaga rages India	25
First well known and one of the most prominent climbers, much prized for its profuse sky blue flowers; second being a pure white variety of the same; third has spiendid rose-colored flowers, and will require more heat than the above.	
Pueraria Thunbergiana, Japan	25
	25
Rosa moschata, Himalaya Quite vigorous; single white flowers tinged with yellow; one of the kinds used for disti ling "attar" of roses.	111
*Russelia juncea, Mexico	25
*Russelia juncea, Mexico	
*SELAGO PHYLICOIDES, Transvaal Creeping on the ground, with minute leaves and white flowers: a very pretty pot plant.	25
SEMELE ANDROGYNA, Tenerife	1 00
Looking like a gigantic "smilax;" will climb 50 or 60 feet, displaying dark green tropical foliage, likely to be mistaken for some of the Indian climbing Palms.	
**SOLANDRA GRANDIFLORA, Jamaica	50

Solanum jasminoides, south America	25
Solanum jasminoides grandiflorum	25
Solanum jasminoides fol. var	25
*Solanum Seaforthianum, West Indies	25
*Solanum Wendlandi, Guatemala To be sure one of the most gorgeous and striking climbers known, covered all summer and autumn with huge trusses of large lilac blue flowers. Being deciduous in winter it, ought to be associated with other evergreen climbers, as would be Bignonia venusta, whose orange flowers will beautifully harmonize together.	25
Sollya heterophylla. Tasmania	25
Stauntonia hexaphylla, ChinaElegant foliage; spikes of white fragrant flowers in spring.	25
**Stephanotis floribunda, Madagascar Truly a noble plant, with glossy fleshy leaves and pure white flowers exquisitely fragrant	25
*Stigmaphyllon ciliatum, Brazil	25
*Tacsonia exoniensis, garden hybrid	25
*Tacsonia Jamesoni, Ecuador	25
*Tacsonia mollissima, Ecuador	25
Tacsonia tubiflora, Chile	25
*Tacsonia Van Volxemi, New Grenada Flowers bright crimson, hanging from a very long wiry pedicel. Nearly related to Passifloras, Tacsonias are among the most desirable climbers, for their freedom of gröwth and profusion of their showy blossoms.	25
Tecoma grandiflora, China	25
Tecoma grandiflora atrosanguinea Both deciduous; first with orange: second with blood red flowers.	25
*Tecoma jasminoides, Australia	25
*Tecoma jasminoides alba magna Evergreen, with glossy leaves and almost everblooming; first having white flowers with crimson throat; second pure white of larger size.	50
*Tecoma Mackenni, south Africa	25
*Thunbergia fragrans, India Large, pure white flowers; very fragrant.	50
*Thunbergia grandiflora, India A great grower: flowers larger than preceding of beautiful blue color.	50

*Thunbergia Mysorensis, India Known also as Hexaceutris Mysorensis; a most vigorous climber with rich g'ossy foliage; flowers scarlet and yollow in very long bunches; very showy and sure to become a general favorite for winter blooming.	50
Trachelospermum jasminoides, southern China Dark green foliage, literally covered with white fragrant flowers in spring; will stand several degrees of frost.	. 25
Vinca major, southern Europe	25
Vinca major fol. var. The large periwinkle: trailing, with large blue flowers, most adapted for borders, rockeries and hanging baskets, more particularly the second with variegated leaves: standing well drought and frost.	25
*VITIS BAUDINIANA, Australia	25
Vitis Coignetiae, Japan	50
*VITIS HYPOGLAUCA, Australia Very elegant foliage, dark green above, glaucous underneath.	50
Wistaria chinensis, China	25
Wistaria multijuga, Japan Similar in habit to the preceding, but not such a fast grower: flowers of two shades of lilac in bunches often over two feet long.	50

BULBOUS, TUBEROUS AND PERENNIAL PLANTS.

Bulbs differ from Tubers in having one central shoot with fleshy or leathery envelopes, while Tubers are of more irregular shape, often presenting several eyes, each originating a separate plant. The Onion is a good exemplification of a bulb: the Potato of a Tuber. Both bulb and tuber are provisions for storing material necessary to the ensuing growth of the plant; and the colder or the more arid the country will be, the deeper will they be buried under the ground; a circumstance not to be forgotten when submitting them to artificial culture. Perennials do not possess a bulb nor a tuber, but are provided with more or less fleshy or woody roots, bunched together or running under ground, sometime at considerable distance; the familiar Alfalfa representing them well. As a general rule these three classes of plants, once established in suitable ground, will take care of themselves, needing only occasional fertilizing and thinning if too much overcrowded. Among them are to be found the brightest ornaments of our gardens and the easiest plants to grow and to propagate. condensed list of the most desirable is given below, without attempting a full enumeration of varieties, their number running into the thousands,

Acanthus spinosus, southern Europe The classic Acanthus, most remarkable for its bold foliage and huge spikes of purple and white striped flowers.		2
Agapanthus umbellatus, south Africa		2
*Agathaca coelestis, south Africa Daisy like flowers of the most exquisite sky blue.		25
*Alonzoa incisifolia, Peru and Chile Prettily cut foliage: hood shaped flowers, ranging from scarlet to pure white.		2
Althaea sidaefolia, southern Europe		2
Amaryllis belladona, Cape of Good Hope		2
Amaryllis formosissima. Mexico		2
"Jacobean lily," flowers velvety scarlet in spring. *Amuryllis Johnsoni, garden hybrid		2:
Flowers dull red, with white stripes, in spring. *Amaryllis Reginae, Brazil.		28
*Amaryllis vittata, hybrid varieties	25 to 1	
All Amaryllis succeed well here and in any kind of soil, their bulbs attaining very large size.		
Anemone, garden varieties To be sure the most charming and showy flowers of early spring: every hue except yellows being found among them.		10
Anemone japonica, Japan		25
Anemone japonica alba, Japan The first with rose colored, second with pure white flowers, standing well over the foliage: fall blooming, will prefer partial shade.		25
*Begonia, garden varieties. All the best supplied of the tuberous, ever blooming, and other types: doing admirably wellon this coast, preferably with partial shade.	10 to 1	00
*Canna fluccida, Florida Dwar': leaves glaucous: large pure yellow flowers with broad petals: will need plenty of water.	•	25
Canna, garden varieties. The very bett supplied, of the tall growing, of the Crozy and other types: great favorites here where they are literally everb coming.	10 to 1	00
Centranthus ruber, southern Europe Kapwa als) as Vierian; this and its white flowered form make large everblooming masses, growing in any soil and without irrigation.		10
Cineraria maritima, southern Europe Feathery silvery white leaves, and large trusses of yellow flowers, here produced all the year round.		25
Clematis recta, Europe		25
44 0 0 0 0		25
*Clivia nobilis, south Africa. Leaves dark green, similar to the Amaryllis, flowers bright orange in large heads: winter blooming.		20

*Cyclamen, garden varieties The very best supplied in different colors: will prefer partial shade.	25
	F.0
*Dahlia arborea, Mexico	50
*Dahlia imperialis, Mexico Both of them building half woody stems several feet high, but dying to ground out of our clast region: both much admired and striking plous, with bold foliage and large lily shaped flowers, bright mauve in the irst, pure white with crimson eye in the second: blooming in the fall and	50
Dahlia, garden varieties	10 to 50
Best varieties supplied of the different strains, Cactus, Pompons, etc.	ຄະ
Delphinium cardinale, southern California	25
*ECHIUM CANDICANS, Madeira	25
*ECHIUM FASTUOSUM, Canary islands	25
*ECHIUM SIMPLEX, Canary islands. 'Il of them very decorative plants, with picturesque, more or less silvery foliage, bearing huge cylindrical spikes of flowers, blue in first and second, pure white in third, on this last att ining several fet in length. Echiums are eminentry suited for dry places, and need good drainage at their roots.	25
*Erpetion reniforme, Australia	25
	10 to 25
*Freesia refracta alba, south Africa	
Galtonia candicans, south AfricaLooking like a giant Hyacinth: tall spikes of bell shaped, pendulous, white flowers in summer.	25
	25
Gaura Lindheimeri, Texas	
Gazania splendens, south Africa	25
Geum coccineum, Chile?	
Gladiolus, garden varieties	10 to 50
*Hedychium coronarium, India	25
*Hedychium Gardnerianum, India	· 25
Called by some people "Ginger p'ants" for a slight gingerly taste of their r.ots; both with ropical looking foliage, first having pure white fragrant flowers, second orange yellow, scentless flowers.	20
Hemerocallis rutilans, Japan	25
Hemerocallis, Thunbergii, Japan "Day-Lilies" very hardy and free growing; first with orange flowers in summer; second earlier blooming, having sweet-scented flowers.	25
Heuchera sanguinea, Arizona	25
Heuchera sanguinea, Arizona. Le wes in a ros tte, spreading, mottled whitish; graceful erect spikes of the prettiest pink flowers; in bloom for several months.	

Iris florentina, Italy	25
Iris germanica, south Europe. Size of preceding, but with wide range of colors, from white to deep purple yellow, and bronze. Both kinds are great bloomers, very showy, and will stand well intense cold and heavy drought.	25
Iris laevigata, Japan Flowers very large, almost flat when open, in endless variety, where all hues of blue, purple, state, yellow and white are blended together. These are summer blooming, and will do better with liberal supply of water.	25
IRIS STYLOSA ALBA, Greece	25
IRIS STYLOSA SUPERBA, Greece. Leaves narrow, grass-like in dense tufts; flowers pure while in the first, bluish purple in the second, appearing in the greatest p ofusion from October all through the winter. Very valuable for cut flowers; will not stand much frost, and will prefer partial shade.	2 5
Iris xiphium, Spain Leaves few: flowers with narrowed and channelled segments, offering the prettiest combinations of bright blue and golden yellow: blooming late in spring.	25
*Ixia crocata, Cape	25
*Ixia, garden varieties. Taller growing; flowers in erect; taller spikes, of the most bright and gay appearance, almost every possible color being represented among them: will thrive in any kind of soil.	25
Kniphofia aloides, south Africa	25
Kniphofia Mac Owani, south Africa	25
KNIPHOFIA WOODII. Natal	25
KNIPHOFIA WOODII, Natal	20
Lilium Lilium	
The true Lily; all kinds supplied at proper season; detailed lists with prices mailed on application.	
Lychnis flos cuculi fl. pleno, Europe Dwarf; pretty, fringed, double, rosy pink flowers, suitable for bouquets.	25
*Lycoris aurea, China Blooming in the style of Amaryllis Relladona: flowers golden yellow in summer.	1 00
Montbretia crocosmiaeflora, south Africa	25
Moraea fimbriata, China	25
Moraea Robinsoniana, Lord Howe's Island	50
Oxalis cernua, north Africa	10
Oxalis Deppei, Mexico	10

Oxalis purpurea, south Africa First taller growing, with canary yellow flowers; second being dwarfer with purple pink flowers; the last not over three incles high, with large rosy pink flowers, well set out by the admirable emerald green of its leaves; all of them excellent for borders, and thriving everywhere,	10
Plumbago Larpentae, China Dwarf: cobalt blue flowers, very pretty; prefers shade.	25
Polyanthes tuberosa, Mexico	25
Ranunculus, garden varieties	10
Saxifraga cordifolia, Siberia	25
Saxifraga crassifolia, Siberia	25
Saxifraga peltata, California	25
Scilla campanulata, southern Europe	25
Scilla Clusii, Mediterranean region Dwarf, with broat leaves and dense spikes of azure blue flowers; early bloomer, very showy.	25
Sedum Sieboldi fol. var., Japan	25
Sedum spectabile, Japan	25
*Statice Halfordi? Tenerife A beautiful plant: suffrut scent; very large, undulated leaves; enormous heads of everlasting blue flowers.	50
Sternbergia lutea, southern Europe	25
Vallota purpuren, south Africa	25
VERBASCUM UNDULATUM, Greece A very remarkable "Mullein;" leaves large, white, woolly, frilled; bright yellow flowers in spikes, all the year round.	25
VITTADINIA AUSTRALIS, Australia and Tasmania A charming dwarf plant: we 1 suited for rockeries, borders and hanging baskets, covered with myriads of daisy-like, white flowers.	25
Zephyranthes candida, River Plate	25
Zephyrauthes rosea, Cuba	25

CALIFORNIA NATIVE PLANTS.

The contents of this Catalogue show well enough how plants from almost every corner of the world are represented in our gardens; and on the other hand it must be acknowledged that California has liberally been repaying her debt for them; few other countries, indeed, having made such extensive contributions to the flora of gardens at large, in every line, from the majestic Sequoia down to the host of lovely flowering annuals. There is, however, quite a number of other California plants, hardly known up to now, and well worth introducing into culture, and of such, a first selection is offered below. Descriptions and prices of many of them are given in pages above, as noted in front of each. Their degree of hardiness must necessarily vary, according as they are native of the high ranges of the Sierras or of the mild coast region of Southern California. Fuller details will be given to persons applying for them.

Agave deserti, page 6		
Agave Shawii, page 7.		
Amemopsis Californica, "yerba mansa". Medicinal; flowers accompanied by showy, white bracts; gr ws only in wet places.		25
AUDIBERTIA GRANDIFLORA. Leaves broad: tall spikes of red flowers in early spring.		25
Castanopsis chrysophylla The golden chestnut: ever reen, attaining 100 feet and over in the north; leaves golden color undernea at fait edible, size of fliberts.	25 to 5	2 00
Chlorogalum pomeridianum, "Amole" Very large bulbs; leaves long, frilled; tall, branching panicles of star-like, white flowers, opening only in the afternoon.		25
CONVOLVULUS MACROSTEGIUS, page 43.		
CONVOLVULUS VILLOSUS, page 43.		
Cotyledon lanceolata,		25
Cotyledon laxa		$\frac{-}{25}$
Cotyledon edulis		25
Cotyledon pulverulenta Alleminently suited for rock and house plants: last attaining over one foot in diameter		25
Cupressus Guadalupensis, page 20.		
Cupressus macrocarpa, page 20.		
Darlingtonia Californica The California pitcher plant; very curious and remarkable; easily grown in water.	25 to	o 50
Delphinium cardinale, page 50.		
Diplacus glutinosus		25

DIPLACUS PARVIFLORUS	25
Both shrubby: first having buff-colored flowers second searlet, smaller.	0=
ELYMUS CONDENSATUS	25
A tall and strong growing grass; leaves broad, dark green; flower spikes quite conspicuous; highly decorative; will stand drought and cold.	
ENCELIA CALIFORNICA	25
Shrubby; large yellow flowers with black center, like the more familiar Rudb ckia.	
EPHEDRA TRIFURCA page 43.

88 Pages, with Index comprising over 600 Genera of Plants.

Price 35 Cents. Free by mail from the author,

DR. F. FRANCESCHI, Santa Barbara, Cal.

"... There is no doubt of its value, and I presume that the botanists and horticulturists of the country will fully appreciate it, and that there will be a great demand for it in the semitropical regions of the United States"

J. STERLING MORTON.

U. S. Secretary of Agriculture.

"....The work contains much useful information not to be found elsewhere, and will be suggestive to those who wish to experiment with new plants."

THE EXAMINER, San Francisco.

"....It describes several hundred plants and is carefully indexed, so that it becomes in reality a manual of our most important exotics. Its cost -35 cents -is hardly an iota of its value to the plant lover."

PACIFIC RURAL PRESS, San Francisco.

".... This cleverly written work is dedicated to the ladies of Santa Barbara, and deserves, and no doubt will receive, the liberal support of all professionists, as well of those that take an interest in botany."

THE SOUTHERN GARDEN, New Orleans.

".... In the great scarcity of books we have on such matters, it ought to prove useful generally in the south."

THE AMERICAN GARDENING, New York.

" ... The author being well qualified by reason of long training and experience gained during years of travel and observation in this class of work, the nomenclature is reliable, while his deductions and suggestions are practical and to the point." THE RURAL CALIFORNIAN, Los Angeles

"....This careful handbook should serve both now and in the future to prove what has been done, and what may yet be accomplished in acclimatising plants in California." THE GARDENER'S CHRONICLE, London
